"**EMM** and **Chemicar** united by the chance to improve."

Excellent paint processing solutions driven by innovation!

EMM is the driving force behind the Colad, Finixa, and Hamach brands, with its headquarters in Zwolle, Netherlands, and several branches worldwide, including Belgium, Germany, France, and the USA. EMM develops, produces, and distributes innovative solutions for paint professionals in various sectors, including automotive, OEM, marine, aviation, and decorative markets.

Our mission is to deliver smart and innovative products that support every stage of the paint spraying process, from preparation to completion. We collaborate closely with paint professionals to create solutions that enhance safety, efficiency, quality, and sustainability in their work. These non-paint products are used globally in industries where large-scale paint processing is key.

With an in-house R&D department and a 450 m² technical training center in Belgium, we continuously work on **improving processes** like filling, sanding, masking, and paint application.

Our commitment to constant innovation ensures that professionals can perform their tasks with optimal results.

In response to rapid changes in the paint industry—such as material availability, energy use, and evolving legislation—Colad, Finixa, and Hamach have united under one organization as of 2024.

This collaboration aims to provide paint professionals with the best possible support and solutions to meet the increasing demands of the global market.

PRODUCT CATALOGUE

We are very proud to present to you our **new 2025 catalogue**, further diversifying our high-quality product range for the professional car body shop. Colad, Finixa and Hamach together as your one-stop-shop for collision repair solutions.

USER FRIENDLY

To ensure a user-friendly experience, our products are divided into 14 chapters, structured according to the paint process. At the beginning of the catalogue, you'll find a clear index that provides an organized overview of these chapters.

"Available everywhere—find us on your favorite digital platform. Stream, download, or engage anytime, anywhere!"

We use icons to help us classify products; for example to indicate water-based or UV-products.

The world of committed innovators

EMM International is a leading company offering innovative solutions for the paint processing industry.

EMM is home to three strong brands: Colad, Finixa, and Hamach, each specializing in high-quality products and services for professionals in sectors such as automotive, OEM, marine, aviation, and the decorative market. From its headquarters in Zwolle and international branches in Belgium, Germany, France, and the USA, EMM focuses on developing, producing, and distributing smart solutions that optimize the entire paint spraying process, from preparation to completion.

With a strong focus on innovation, quality, and collaboration with professionals worldwide, EMM empowers companies to perform their work more safely, efficiently, and sustainably.

EMM operates through a global network of dealers, allowing body shops to purchase Finixa and Colad products directly from our trusted partners. We have distributors, both exclusive and non-exclusive, across nearly 125 countries, ensuring easy access to our products worldwide.

Certified Quality and Sustainability

We are proud to be ISO 9001 and ISO 14001 certified. ISO 9001 ensures our products meet the highest quality standards, focusing on continuous improvement and customer satisfaction. ISO 14001 reflects our commitment to sustainability, minimizing environmental impact through responsible practices. These certifications demonstrate our dedication to delivering quality products while caring for the environment.

“Together, we elevate – three brands, **one unstoppable force.**”

Colad partners with the paint processing industry to provide innovative solutions for paint application, prioritizing the work and well-being of paint professionals. With a focus on quality and perfection, Colad continuously innovates to enhance customer experience. Recent product launches include the Colad BodyGuard®, Snap Lid System®, Turbomix™ Paintsaver™, Blizzard White, UV Fast Curing System® and the Pro Planet Proof range, which emphasizes sustainable production.

www.colad.com

Hamach specializes in high-quality central dust extraction and durable mixing room equipment, prioritizing safety, quality, sustainability, and innovation. Its engineers maximize material and technique efficiency, designing equipment that performs reliably in all conditions, making Hamach a trusted choice in paint processing and beyond.

www.hamach.com

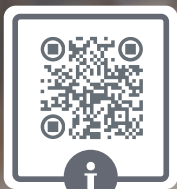

Finixa simplifies damage repair and serves as a knowledgeable partner to its customers. Finixa offers a complete range for paint preparation, application, and finishing. The brand focuses on innovation and sustainability, staying ahead of the market. Recent launches include the Finixa Green Paint System and an ecological product line, replacing traditional solvent-based products with water-based alternatives.

www.finixa.com

Training centre

Our training centre, located in Zwijndrecht, Belgium, is a state-of-the-art facility fully equipped with the latest technology for the automotive aftermarket, including a spray booth. We organise courses and workshops as a forum to share knowledge and experience, offering hands-on demonstrations to customers from around the world on how to use Finixa and Colad products effectively. We also provide online demonstrations and product training, ensuring that dealers and body shops can work safely and achieve perfect results. Our 450 m² training centre is designed to help professionals stay at the forefront of industry developments.

DISPOSABLE NITRILE GLOVES BLACK

Not just any glove is suitable for use in the painting process. When working with paints, protection of the painter is of the utmost importance. Paint is, together with labour, the most expensive component in a paint processing company. Colad nitrile gloves prevent hairs, skin fibres and skin grease from coming into contact with the paint and protect the user against chemical splashes.

- With convenient bin bag fastener
- Tearing element helps to block the roll in the right position and tear off one or more cloths
- For rolls with core of min. Ø 5 cm to max. Ø 7 cm and length min. 30 cm to max. 37 cm

SOF 92

**Colad****TACK CLOTH WATERBASED**

Tack cloth for small, medium and large dust particles. Made of viscose and polyester. Combined compact and open structure. For maximum dust removal due to large non-woven surface. Does not stick to the hands. Removes imperfections on various substrates before spraying.

- For use with water and/or solvent based coatings
- Can be applied as transition edge remover
- Size: 61 x 37 cm, set of 10 pieces in a plastic bag

000805

**Colad****TACK RAGS GAUZE**

Recommended for medium to large dust particles. Made of cotton gauze. Open structure. For use with water and/or solvent based coatings. Anti-static and lint free. Natural Impregnated with an unique tacky formulation for a better wiping efficiency (no chemical treatment or bleaching).

- High quality 100% cotton (13 yarn gauze)
- Will not harden or dry out
- Size 82 x 45 cm, box of 10 pieces in individual bags

9165

**Colad****TACK CLOTH WAFFLED**

High quality, large textured cotton cloth. Superior dust holding capacity! The cotton wipe is specially designed to collect and remove loose contamination such as dust, dirt, hair and lint from surfaces. The Tack Rag is recommended for large dust particles but also eliminates the smallest dust particles in an instant.

- Textured construction provides a soft, high retention wipe
- High tack resin impregnation, ensuring excellent dust retention
- Size: 81 cm x 92 cm (unfolded), 14 cm x 17 cm (folded), packed per piece

9175

**Colad****NON-WOVEN TACK CLOTH**

Recommended for small to medium dust particles. Made of viscose and polyester. Compact structure. For use with water and/or solvent based coatings. Natural binders (no solvents) so solvent compatible. Lint free.

- To remove small particles of dirt, dust and so on
- For use with water and/or solvent based coatings
- Size: 32 x 45 cm, box of 10 pieces in individual bags

9180

TACK RAGS SMOOTH

The perfect solution for anti-static dust removal before painting. Impregnated with a water-based product, these tack rags leave no traces of glue, ensuring compatibility with various paints. Ideal for large surfaces.

- Works anti-static, unlike other tack rags
- Also ideal to quickly remove dust from furniture or other smooth objects on wood, metal or plastic
- Size: 38 cm x 45 cm, 30 x 6 pieces in plastic foil

TAK 30

TACK RAGS

With a unique impregnation that never dries out and is silicone-free, these tack rags effectively wipe away dust when used gently. For an extra advantage, Tack Rags TAK 01 are impregnated with a water-based product, providing an anti-static effect and ensuring no traces of glue are left behind, preventing any potential reaction with paint.

- Unique impregnation: never dries out - silicone-free
- Size: 80 cm x 45 cm, per 50 pieces

TAK 00 Regular

TAK 01 H2O

TACK RAGS CTI

With a wavy surface structure, these tack rags are instantly ready for use once removed from the packaging. For an extra advantage, Tack Rags CTI TAK 11 are impregnated with a water-based product, providing an anti-static effect and ensuring no traces of glue are left behind, preventing any potential reaction with paint.

- Ideal for large surfaces
- With a wavy surface structure: once removed from the packaging, instantly ready for use
- Size: 80 cm x 80 cm (TAK 10) or 80 cm x 90 cm (TAK 11), 50 pieces

TAK 10 Regular

TAK 11 H2O

TACK RAGS SOFT

Crafted from non-woven material (no cotton), these tack rags are designed to be unfolded completely and then formed into a ball for effective and gentle dust removal. It is important not to apply pressure during use to avoid moving dust around rather than eliminating it.

- Made of non-woven material, no cotton
- Before use unfold completely and then make a ball; use this ball to rub the surface gently, by doing so the rag will wipe away all dust
- Size: 17 cm x 45 cm, 100 pieces

TAK 20

SILICONE REMOVER

Our versatile water-based degreaser is designed to remove dirt, dust, swarf, and grease from surfaces like old paint, primers, metals, and plastics. Ideal for water-based and solvent-based paints. It replaces both water- and solvent-based cleaners, including silicone removers.

Unlike solvent-based options, this degreaser is safe to use, won't damage rubber or plastic, and has an antistatic effect on surfaces.

**Colad****COMPRESSED AIR NOZZLE WITH VALVE**

The Colad Compressed Air Nozzle with Valve is a perfect method to guide your compressed air towards the exact spot where the air is needed, without loss of pressure. Suitable for guiding the air on paint and putties. The nozzle can also be used for removing dust or use it for cooling down the temperature of objects. Per piece.

- Reduces the cost of drying
- Low-cost tool
- Integrated air control valve to in- or decrease airflow

10900**Colad****GLASS SCRAPER**

Scraper specially designed for the body shops, to remove the overspray on car windows if they have been sprayed accidentally. Will not cause scratches. With 5 spare blades. Per piece.

- Scraper specially designed for the body shops.
- To remove the overspray on car windows if they have been sprayed accidentally
- Will not cause scratches

**Colad****UNDERCOATING M40**

Protects against corrosion and salt. Noise-absorbing, flexible and chip-resistant. 1 L tin with spray gun connection. Colour black.

- Proven durability
- Does not produce a spray mist when applied
- Sound deadening properties

4000**Colad****UNDERCOATING SPRAY GUN ADJUSTABLE 2-8 BAR**

Gun for the application of undercoating and cavity protection products in tins of 1 L. Gun with an air connection and a nozzle to apply the product on the surface. This gun is also equipped with an adjustable nozzle to adapt the spray pattern. Per piece.

- Adjustable nozzle diameter 0 - 5 mm for spraying with different spray patterns (orange peel effect).
- Equipped with a thread that fits directly on (almost all) 1 liter cans.
- Made out of high quality materials. Well-balanced in use. Robust construction.

90672674**Colad****UNDERCOATING M80**

Undercoating with anti-corrosion and noise reduction properties. Material made of rubber and resins. After drying, the coating is paintable. The coating offers excellent protection against climatic influences and against gravel and stone chips. 1 L tin with spray connection (suitable for +/- 2.5 m²).

- The coating offers excellent protection against climatic influences and against gravel and stone chips
- Very good adhesion to a wide range of substrates
- Very good resistance of weather influences spray water and abrasion

4010 Black**4030** Grey**Colad****DISPOSABLE UNDERCOATING SPRAY GUN**

Gun for coating application with disposable tube and nozzle. Saves cleaning time and costs. Includes disposable and replaceable tube and nozzle. Per set.

- Saves cleaning time
- Saves costs

ALLROUND NEOPRENE PUTTY

Allround Neoprene Putty is a petrol and oil resistant compound. While remaining elastic after drying, brush and spray textures are retained. Allround Neoprene Putty is repaintable. Application: seals body panel joints, e.g. in the trunk of a car and other parts of the bodywork. Allround Neoprene Putty is delivered ready for use. Directions for use: Apply Allround Neoprene Putty to a clean, dry, oil-free surface. Colour grey. 1 kg can.

- Delivered ready for use
- Repaintable
- Resists temperatures ranging from -25°C to +80°C

4060 1 kg

4070 Nylon brush for application

FINIXA

EASY SEAM SEALER ON A ROLL

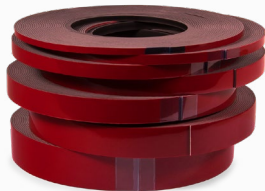

The OEM profile sealer for doors, bonnets, and boot lids. Quick, heat-resistant, and paint-ready. 9 m. per roll.

- ESS 06: for Japanese, Korean and French cars
- ESS 08: most of the German cars (Mercedes, Volkswagen, Audi)
- ESS 10: BMW, vans and large SUVs

ESS 06 6 mm

FINIXA

DUCT TAPE 50 MM X 50 M

This tearable tape is perfect for protecting bodywork against unintended paint damage during sanding. Its residue-free removal makes it convenient for temporary applications, such as towing or transporting damaged vehicles. Choose from silver or black options, both offering high-quality performance. Solve problems and ensure protection with Duct Tape, your reliable, multi-purpose solution. Per roll.

- Strong but tearable cloth based tape
- Very suitable for protecting the bodywork against sanding through paint on an adjacent area

TAP 50 Grey

TAP 52 Black

INSTANT ADHESIVE GEL 20ML

Instant adhesive gel provides a rapid bonding of a wide range of materials (metals and plastics and others). Can also be used to bond porous materials such as wood, paper, leather and fabric. Perfect for OEM assembly. Per piece.

- Medium viscosity
- 1k-product
- Cures at normal room temperature

IAG 20

MS FAST ADHESIVE

A construction and assembly adhesive with very high initial tack for the professional market, based on hybrid technology that forms as a durable elastic rubber after curing. Can be applied on bare plate without risk of corrosion. Shrink and air bubble free. Absorbs sound and mechanical vibrations. Can be oversprayed with all common 1K or 2K paint systems on the market. Does not contain any isocyanates, phthalates, solvents or silicones. 290 ml. White. Per piece.

- Durable, permanent elastic
- Universal bonding and sealing
- Adheres perfectly without primer on most even damp surfaces

MSA 100

SPRAYABLE SEAM SEALER - 290 ML

High-quality MS Polymer formulation for firm-setting applications in auto body seams and joints. This versatile sealer requires no primer, offers excellent adhesion, and allows for paintability after just 30 minutes. The standard 290 ml cartridge fits all caulking guns, and it's available in white, grey, black, and beige colours. Per piece.

- No primer needed
- Good adhesion
- Lasting flexibility

MIXER TIPS FOR PLASTIC REPAIR - 50 ML

Enhance your plastic repair process with our Mixer Tips for Plastic Repair (50 ml, pack of 10). These disposable static mix nozzles are specifically designed for use with Finixa plastic repair products. Each pack contains 10 mixer tips, ensuring a convenient and efficient application for your plastic repair needs. Per 10 pieces.

- Disposable static mix nozzels for Finixa plastic repair

PLI 05

REINFORCEMENT CANVAS 12 CM X 3.6 M

Enhance the durability of your plastic repairs with our Reinforcement Canvas. Measuring 12 cm x 3.6 m, this product is a strategic combination of fiberglass reinforcing tape and release film. It's meticulously designed to provide additional strength to your repair work, ensuring long-lasting and robust results. Per piece.

- Combination of fiberglass reinforcing tape and release film
- Designed to provide additional strength to the repair

PLI 15

PLASTIC REPAIR SET

A comprehensive solution packaged in a convenient case for all your plastic repair needs. This set includes essential items. Make your plastic repairs seamless and efficient with our all-in-one Plastic Repair Set. Per set.

- Contains the following items: PLI 10 - PLI 16 - PLI 15 - PLI 05 - PLI 01 - PLI 02 - PLI03 - TSP 030 and TSP 600

PLI 00

APPLICATOR GUN FOR PLASTIC REPAIR

Empower your plastic repair tasks with our Applicator Gun for Plastic Repair. This manual bi-mixer is designed for use with side-by-side 50 ml 1:1 cartridges, providing precision and ease in dispensing plastic repair materials. Per piece.

- Manual bi-mixer for side by side 50 ml 1/1 cartridges

PLI 10

CONTOUR CANVAS 12 CM X 3.6 M

This plastic contour release film plays a crucial role in preventing air entrapment in the adhesive. Use it to force the bead of adhesive into the groove and shape it closely to the original contour before hardening. Elevate your plastic repair projects by ensuring meticulous attention to detail and optimal results with our Contour Canvas. Per piece.

- Plastic contour release film
- Prevents air entrapment in the adhesive
- To force the bead of adhesive into the groove

PLI 16

METAL BONDING

An epoxy-based glue meticulously developed to seamlessly bond panels of equal or different materials. This innovation provides a welding alternative, offering a versatile solution for various applications, such as roof panel replacements, attaching aluminum fenders, or affixing aluminum door panels to steel door frames. Choose efficiency, reliability, and precision in your projects with our Metal Bonding solution. Per piece.

- 60 min.
- Colour: Black
- 220 ml

- 10 pieces
- Length: 162 mm
- Material: Polypropylene

PLI 55

APPLICATOR GUN FOR METAL BONDING

Optimize your metal bonding applications with our Manual Bi-Mixer Applicator Gun, specially designed for 220 ml 2/1 cartridges. This versatile tool ensures accurate and efficient dispensing, making metal bonding processes smoother and more precise. Per piece.

- Manual bi-mixer for 220 ml 2/1 cartridges

PLI 60

**Colad****MIXING BOARD**

Mixing board specially developed for preparing filler. Compact, handy and clean. Use new paper for every job. Per 100 mixing sheets.

- Multilayered
- Avoids soaking up resins and solvents
- Clean work

000846

**Colad****SELF ADHESIVE NOISE ABSORBING SHEETS**

Self Adhesive Noise Absorbing Sheets are designed to be applied to the interior sheets metal of car doors, trunk, carroofs etc. These sheets are made of 100% heat resistant bitumen. Excellent noise and vibration reduction properties. The Sheets are repaintable. Thickness: 2.2 mm. Per box of 8 sheets of 250 mm x 500 mm.

- Repaintable
- 100% heat resistant bitumen
- Excellent noise and vibration reduction

4050

**Colad****PERMANENT ATTACHMENT TAPE**

Transparent double-face tape, for attaching strips, registration plates and accessories to cars. Clear, permanent bonding, double-sided film. Thin and highly durable. Quick and simple to apply. Resulting in an appearance equal to OEM standards. Per roll in a plastic bag.

- Resistant to the influence of UV Light
- Can be used on a wide variety of substrates
- Offers an easy liner and easy to reposition acrylic adhesive

900509 9 mm x 9 m

900512 12 mm x 9 m

**Colad****DOUBLE-FACED ACRYLIC FOAM TAPE**

Double side foam tape (0.8 mm thickness), to attach strips, registration plates and accessories to cars. Weather resistant. Roll length: 10 m. Per roll in a plastic bag.

- Adheres weather strips, registration plates and accessories to cars
- Good initial adhesion strength
- UV, water and petrol resistant

901006 6 mm

901019 19 mm

901009 9 mm

901025 25 mm

**Colad****SEAM SEALING TAPE**

Seam Sealing Tape is a reinforced acrylic tape with high tack and shear strength performance acrylic adhesive. Excellent resistance to solvent, chemical, UV and heat, making the tape bond securely to a very wide range of substrates. Ideal for reviving older sealings and/or paint preparation on automotive doors and -angels. Per roll of 9 m.

- Ideal for renewing sealing seams automotive doors and angels
- Easy to use and to apply
- Immediately paintable, you don't need an adhesion promoter

906709 9 mm

906712 12 mm

LOGO TAPE

Revive your logos and emblems with our Logo Tape. This adhesive transfer, measuring 50 mm x 300 mm, offers a simple re-fixing solution. After cleaning the surface and logo with degreaser, remove the cover strip, press the logo onto the adhesive transfer for a few seconds, and then remove the transfer. Per 10 pieces.

- Adhesive transfer with dimensions 50 mm x 300 mm
- Attach your logo securely to the bodywork in the right place
- Simple re-fixing solution

FOL 62

SPRAY TIP

A standard nozzle replacement for both SSS and MSA cartridges. This nozzle is crafted for optimal functionality, ensuring a seamless application of sealants.

- Replacement nozzle for SSS and MSA cartridges
- Standard sealant nozzle
- Per 10 pieces

SSS 000

SPRAY TIP - FLANGED NOZZLE

Our Flanged Nozzle Spray Tip, expertly crafted for creating flawless straight beads up to 13mm wide. The cut flange ensures precision and the exact distance from the edge of the panel, making it a valuable tool for your applications.

- Creates perfect straight beads up to 13mm wide.
- Cut flange to obtain the precise distance from edge of panel.
- Per 100 pieces

SSS 005

INNER NOZZLE FOR SPRAY SEALANT APPLICATIONS

Inner nozzle for spray sealant applications. Can be used with CSG 00. Per 5 pieces.

CSG 01

BLACK OUTER NOZZLE FOR COARSE STRUCTURE

Black outer nozzle for coarse structure. Can be used with CSG 00. Per 5 pieces.

CSG 02

BLACK OUTER NOZZLE FOR FINE STRUCTURE

Black outer nozzle for fine structure. Can be used with CSG 00. Per 5 pieces.

CSG 03

BRUSH - 30 MM

A semi-rigid nylon brush designed for precise application and structuring of seam sealers. This versatile tool aids in replicating the original factory finish with ease. Crafted from solvent-resistant materials, it ensures durability and reliability in various applications. Per piece.

- Semi-rigid nylon brush to apply and structure seam sealers
- Helps copying the original factory finish
- Solvent-resistant

SSS 030

SHARPWHITE

SharpWhite features a highly grits specific balanced mixture of ceramic and aluminum oxide grit with high initial cutting power for fast, efficient sanding with a grit specific finish! Its white anti-clog coating increases durability, while the multi-hole design ensures a dust-free environment. SharpWhite sands up to 20% faster than standard discs, reducing work hours and allowing technicians to complete more repairs, boosting productivity and profitability.

Maximize your efficiency with SharpWhite for higher output and better use of resources.

Colad

EVO MAXFLOW SANDING SUPPORT PAD

High performance universal sanding support pad. The Sanding Pad has a diameter of 150 mm and comes with 96 holes for an extreme high level of dust extraction, which will prevent your Sanding Disc from loading. This will keep your abrasives sharp and therefore more durable. Suitable for pneumatic and electrical sanding machines (adapters and bolts included). Can be used with all types of abrasive discs and all of the hole patterns. Per piece.

- Extremely effective dust removal
- High performance & quality
- Perfect end result

3680

Colad

INTERFACE PAD SOFT EVO MAXFLOW

High quality interface pad soft. The high quality soft foam adapts to contours and edges for a finer finish. Reduce edge cutting and maintain closer contact with the edge. To be used with the Evo - MaxFlow sanding support pad (art. no. 3680). Hook & loop, to be used with 150 mm sanding support pad. 3 pieces per box.

- Adapts to the surface
- Easy to use
- High performance & quality

SANDING BLOCK - ERGONOMIC GRIP + 3 SHAPES

This set includes a sanding block with ergonomic grips and 3 different shapes, allowing you to sand flat, concave, and convex surfaces with ease. No more waste of half-used sanding discs – utilize your universal sanding blocks with this set for a precise and economical sanding experience. Compatible with Ø 15 cm red SPDA or white SFDC sanding discs.

- Set of 1 sanding block with 3 different shapes
- Use your sanding disks on your universal sanding blocks
- Ergonomic grip

SAB 07

SANDING BLOCK WITH EXTRACTION 70 X 198 MM - 8 HOLES

This sanding block features an ergonomic grip and balanced weight distribution, ensuring equal pressure during use. With a built-in connection for the exhaust tube, it helps maintain a clean working environment. The rounded angle design makes it easy to replace used sanding paper, ensuring a smooth and hassle-free sanding experience. Per piece.

- Ergonomic grip
- Balanced weight distribution for an equal pressure
- Equipped with a connection for the exhaust tube

SAB 31

SANDING BLOCK FLAT HAND GRIP

With its ergonomic grip, this sanding block is designed to accommodate Ø 150 mm sanding discs. Achieve optimal control and results with the Finixa Sanding Block, ensuring a seamless sanding experience for your projects. Per piece.

- Sanding block
- Ergonomic grip
- For sanding discs Ø 150 mm

SAB 01

SANDING BLOCK WITH EXTRACTION 70 X 125 MM - 8 HOLES

This sanding block features an ergonomic grip and balanced weight distribution, ensuring equal pressure during use. With a built-in connection for dust extraction, it helps maintain a clean working environment. The rounded angle design makes it easy to replace used sanding paper, ensuring a smooth and hassle-free sanding experience. Per piece.

- Ergonomic grip
- Balanced weight distribution for an equal pressure
- Equipped with a connection for dust extraction

SAB 30

SANDING BLOCK WITH EXTRACTION 70 X 400 MM - 14 HOLES

With its ergonomic grip and balanced weight distribution, it ensures equal pressure during use. The built-in connection for the exhaust tube enhances dust extraction, keeping your workspace tidy. The rounded angle design facilitates easy removal of used sanding paper, making it a user-friendly and efficient choice for your sanding needs. Per piece.

- Ergonomic grip
- Balanced weight distribution for an equal pressure
- Equipped with a connection for the exhaust tube

SAB 32

SANDING BLOCK WITH EXTRACTION 115 X 230 MM - 10 HOLES

The ergonomic grip and balanced weight distribution ensure equal pressure during sanding, providing a comfortable experience. The integrated connection for the exhaust tube enhances dust extraction, maintaining a clean workspace. With a rounded angle for easy removal of used sanding paper, this tool combines efficiency with user-friendly design. Per piece.

- Ergonomic grip
- Balanced weight distribution for an equal pressure
- Equipped with a connection for the exhaust tube

SAB 33

BOARD FOR SANDING BLOCKS

The ultimate organizer for your sanding gear. This versatile board offers a customizable solution for storing used sanding blocks and accommodating two eccentric sanders. With its user-friendly design, you can personalize the organization according to your preferences. Keep your workspace tidy and your tools easily accessible with the Finixa hook & loop Board – where organization meets efficiency. Per piece.

- The organizer for your sanding gear
- Can easily contain most of your used sanding blocks and 2 eccentric sanders
- The organization can be personalized, therefore the photograph is showing only one possibility

SAB 50

SANDING BLOCK WITH EXTRACTION 70 X 198 MM - 8 HOLES + 4 SHAPES

A versatile tool designed for precision and efficiency. The ergonomic grip and balanced weight distribution ensure uniform pressure during sanding, promoting comfort and control. With four extensions and eight holes, this tool accommodates various sanding needs. The integrated connection for dust extraction keeps your workspace clean. The rounded angle facilitates the easy removal of used sanding paper. Per piece.

- Ergonomic grip
- 4 extensions, 8 holes
- Balanced weight distribution for an equal pressure

RANDOM ORBITAL SANDER DS 40 MICRO 3.0 - 30 MM PAD

Pneumatic mini random orbital sander for efficient elimination of paint defects. The machine is suited for efficient and simple removal of small irregularities and dried paint runs. Fast sanding. 3.0 - 30 mm pad. Comes with: Mini pad (Hook & Loop) Ø 30 mm (art.no. 022301). Per piece.

- For efficient polishing of paint defects
- Easy to mount by turning it in the machine shaft
- Due to the small eccentric movement of this mini sander, the polishing scratches will be minimized

000223

hamach

ROTATING POLISHING MACHINE DS 70 - 70 MM PAD

Compact Ø 70 mm pneumatic rotating polisher for efficient polishing of paint defects. This pneumatic mini polishing machine is suited for polishing small areas e.g. doorposts and spot repaired surfaces. Supplied in a carrying case with: Support pad (Hook & Loop) Ø 70 mm (art.no 022401). Per piece.

- By using cleaning material, small scratches and other defects in fresh paint can be removed
- The regular rotating movement enables simple and easy polishing
- The noise of the pneumatic rotating polisher is reduced by means of a short ribbed tube

000224

FINIXA

MINI SANDER WITH CENTRAL VACUUM

This premium ergonomic eccentric sanding machine features a 75 mm/3-inch sanding surface with a 2.5 mm orbital action, providing optimal balance and low vibration for enhanced control. The tool operates pneumatically, ensuring reliable performance, and comes equipped with a central vacuum system for efficient dust extraction. Per piece.

- 75 mm/3 inch - 2.5 mm orbital, pneumatic palm sander
- Premium ergonomic eccentric sanding machine
- Perfectly balanced centre of gravity

SAM 41

FINIXA

PREMIUM PNEUMATIC SANDING MACHINE

An ergonomic eccentric sander prioritizing user comfort. With low noise, perfect balance, and vibration-free operation, it features a 150 mm sanding pad for efficient dust extraction. Available in 2.5 mm and 5.0 mm versions for finishing and preparation work, it offers continuous speed control (0-20,000 rpm) and weighs just 790 g, providing versatility for various applications. Per piece.

- Premium ergonomic eccentric sanding machine
- Very low noise level
- Perfectly balanced centre of gravity

SAM 50 2.5 mm

SAM 51 5 mm

FINIXA

PNEUM. ECCENTRIC SAND. MACHINE Ø 75 MM - 2.5 MM DEVIATION

This palm sander ensures precise and controlled sanding. The ergonomic grip enhances operator comfort and control, making it a reliable tool for various applications. The built-in regulator allows for accurate speed control, adapting to different surfaces and projects. Additionally, the muffling system reduces sound levels, creating a more comfortable working environment. Per piece.

- 75 mm/3 inch - 2.5 mm orbital palm sander
- Ergonomic grip provides greater operator, comfort and control
- Built-in regulator for accurate speed control

SAM 02

FINIXA

STANDARD PNEUMATIC SANDING MACHINE

This eccentric sanding machine is designed for low noise, offering a perfectly balanced center of gravity and minimal vibration during operation. The machine comes equipped with a 150 mm sanding pad with bottom hook & loop and 15 holes, catering to various applications. Choose from two options: SAM 00 (2.5 mm deviation) for finishing work (P400 to P3000) and SAM 01 (5.0 mm deviation) for preparation work (P40 to P360). Weighing just 660 g. Per piece.

- Standard ergonomic eccentric sanding machine
- Low noise level
- Perfectly balanced centre of gravity

**Colad****CONTROL POWDER**

Sanding guide to be used as a sanding control coat on fillers. This product is very economical in use and can be widely applied. Per box of 100 g and applicator in each box.

- Instant detection of imperfections
- Economical in use
- Can be widely applied

8035

**Colad****BODY LINE MARKING TOOL**

The Colad Body Line Marking Tool is designed for body shops. This unique marking tool helps you to follow and mark the original body lines of a vehicle in one fluid motion. The included pencil will mark the outer body lines of vehicle design, even on difficult round and curved auto parts, like wheel housing, doors, etc. This can be used to follow the line and improve and speed up the sanding process. Per piece.

- Built-in pencil sharpener
- Due to its extendable size, it can be used for a wide variety of vehicles
- Sustainable design of metal and therefore a valuable tool

8040

**Colad****PREPPING PASTE**

Prepping paste is used to simultaneously degrease, clean and sand the surface before painting. Recommended for application with Colad Scuff Pad S Ultra Fine Grey (Art. No. 38001500). This water based product is absolutely silicone free and does not harm the environment. Per 600 g in a bottle.

- Surface is degreased, clean and matt in one go
- Harmless to the environment
- Ensures a tighter, more even and better paint result

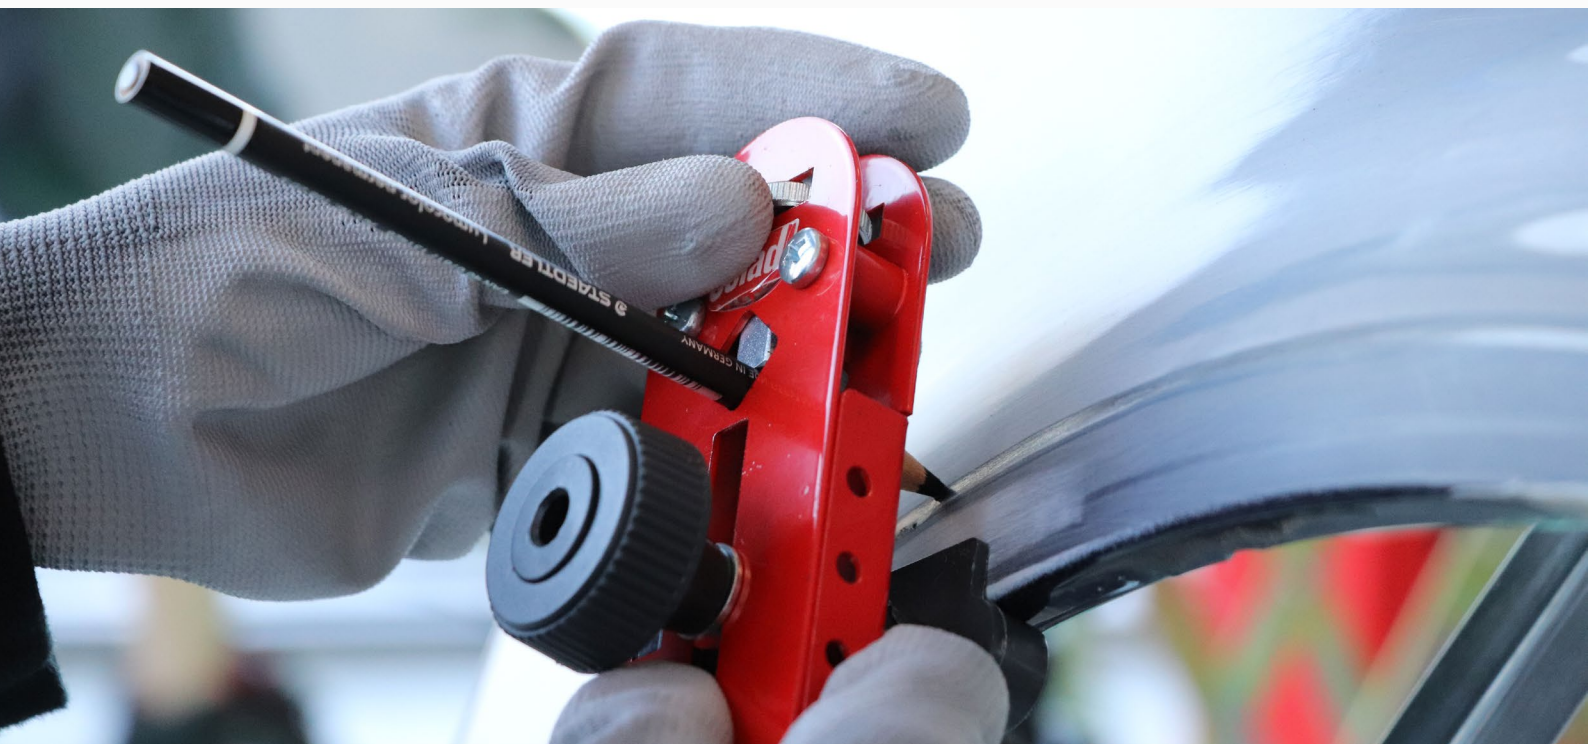

3800

**Colad****RUBBER ERASER PAD**

Specially designed to remove pinstripes, stickers & decals, car lettering, glue residue, attachment tape and foil from paint and chrome surfaces. The pad can withstand up to 4000 RPM and with included adapter it's suitable for use in any drilling machine. 2 pieces in a box, adapter included. Dimensions: Ø 88 mm x thickness 15 mm (thread 33 mm).

- Suitable for use in any drilling machine
- Remove pinstripes, stickers, decals, car lettering, attachment tape and foil
- Suitable for paint and chrome surfaces

PUTTIES & UV

Through continuous innovation and the improvement of existing formulas, we have become one of the leading manufacturers of high-quality putties. Finixa putties, designed primarily for car repair, are trusted and valued by body shops around the world. Understanding the impact of rising labor costs on repair prices, we ensure that all our putties meet the highest quality standards, enabling efficient and reliable results.

To further enhance efficiency and profitability, UV curing technology is becoming a game changer across various paint processing markets. The Colad Fast Curing System offers the most powerful UV curing light and two exceptionally fast-drying UV putties. This advanced system allows for quicker, more efficient workflows and significantly reduces curing times between process steps. By combining premium putties with cutting-edge UV technology, we deliver solutions that streamline processes and drive superior results.

POLYESTER PUTTY LIGHT

A smooth finish every time.

Polyester putty LIGHT is a versatile filler known for its strong adhesion to metals, low shrinkage, and quick drying. It's great for metal, wood, and more, providing a fine, easy-to-sand finish. Its excellent adhesion works on various surfaces like steel, E-coat, galvanized steel, glass fiber reinforced plastics (GFK), and wood. It remains stable even on thin metal and doesn't shrink much. Plus, it dries fast, saving you time on your projects.

Polyester Putty Light

Art.no. GAP 30

Extreme adhesion

Low shrinkage ratio

Short drying time

Easy sanding

POLYESTER PUTTY - GAPOL - 2 KG + HARDENER

Black polyester putty for bodywork repairs with universal adhesion. Quick drying, easy to sand, and features built-in sanding and coverage guides. Per piece.

- Black color with sanding and coating guides for precise application.
- Adheres to steel, aluminum, plastics, and more.
- Quick drying, easy to sand, and regains black color after degreasing.

GAP 00

POLYESTER PUTTY - MULTI - 2KG + HARDENER

Versatile 2K polyester putty with high filling power and stability on vertical surfaces. Fine grain prevents cracking, ideal for finishing or priming. Less suited for light metals and galvanized bases. Per piece.

- Universal 2K polyester putty
- Maximum stability on vertical surfaces
- High filling power

GAP 10

POLYESTER PUTTY - FINE - 2 KG + HARDENER

Fine Polyester Putty. Bright white finishing putty for pinholes, scratches, and minor imperfections. High filling power, easy to apply and sand, with no top coat sinking. Per piece.

- Fine finishing putty. To be used after "MULTI" putty to remove small irregularities.
- To be applied in thin and very thin coats
- Bright white pigmentation

GAP 20

POLYESTER PUTTY - SELF-LEVELLING - 1 KG + HARDENER

Experience perfection with our Self-levelling putty. Achieve an ultra-smooth finish effortlessly, free from pinholes. Ideal for final scratch removal or fixing imperfections. It's easy to sand and a great alternative to GAP 20. Per piece.

- Ultra smooth finishing putty
- Pinhole free self levelling ability
- To finish off any other polyester for final scratch removal or pinholes

GAP 25

POLYESTER PUTTY - LIGHT - 1.5 KG + HARDENER

A versatile filler with strong adhesion to steel, wood, GFK, and more. Known for its low shrinkage and quick drying, it ensures a fine, easy-to-sand finish. Stable on thin metals, it's perfect for various surfaces, saving time and delivering reliable results for your projects. Per piece.

- Universal light putty
- Extreme adhesion on metal surfaces
- High stability in the tin

GAP 30

POLYESTER PUTTY - ULTRA LIGHT AZURE - 1 KG + HARDENER

Ultra-light azure polyester putty with excellent adhesion to steel, GFK, and wood. Features a creamy texture for easy mixing, quick sanding, fine finish, and pinhole-free coverage. Per piece.

- Universal, ultralight polyester putty
- Adheres well to steel, E-coat, galvanized steel, GFK, wood.
- Extra creamy for easy mixing & application

GAP 31

POLYESTER PUTTY - EXTRA LIGHT - 3 KG + HARDENER

Lightweight polyester putty with 50% reduced density for a smooth finish. Adheres to steel, GFK, and wood. Quick drying, low shrinkage, and easy to sand. Per piece.

- Universal extra light finishing putty
- Good adhesion on metal surfaces
- Low shrinkage ratio

GAP 33

POLYESTER PUTTY - FIBER - 1.8 KG + HARDENER

A glass fiber filler designed for larger surfaces, cracks, holes, and rusted areas. Features impregnated fibers for easy spreading and finishing. Ideal for polyester applications with strong adhesion to GFK and high stability. Per piece.

- Universal polyester putty with glass fibres to fill up larger surfaces and bigger irregularities
- Impregnated fibres for easy and equal spreading and finishing
- Perfect for polyester applications and repairs

GAP 40

POLYESTER PUTTY - ALU - 2 KG + HARDENER

Aluminum-enhanced filler for stressed body parts. Fills pores, holes, and irregularities with strong adhesion to steel, aluminum, and GFK. Stable on vertical surfaces, elastic, heat-resistant (90°C+), and easy to sand. Per piece.

- Polyester putty refined with aluminum particles
- Perfect for use on body parts subject to mechanical stress
- Used to fill coarse irregularities, pores and holes

GAP 50

LEAD & TIN REPLACER - 1.5 KG + HARDENER

Alsi 12 is a cold metal alternative to fluid tin, effectively replacing Pb – Sn. It offers exceptional hardness and a flaky composition that provides high flexibility. Per piece.

- Alsi 12 is a cold metal that can be used as an alternative to fluid tin
- Replaces Pb – Sn
- Exceptional hardness

DEB 12

POLYESTER PUTTY - PLASTFILL - 1 KG + HARDENER

Plastfill is a lightweight, flexible putty for plastic and fiberglass surfaces. Offers smooth finishes, quick sanding, and a color-changing guide for precise application. Per piece.

- Light putty specially designed for plastic surfaces
- Very high flexibility
- Smooth finishing

GAP 70

POLYESTER PUTTY - LIGHT AND EASY TO SAND + HARDENER

Light, easy-to-sand polyester putty with self-leveling for a pinhole-free, smooth finish. Ideal for spot repairs, it offers universal adhesion and eliminates the need for finishing putty. Perfect for seamless applications. Per piece.

- Easy to sand light polyester putty
- Very smooth finish
- Pinhole-free due to self-leveling ability

GAP 90 1.9 KG

GAP 93 3.8 KG

HARDENER RED - 50 G

Benzoyl peroxide hardener for polyester-based putties. Ensures optimal curing, with a 1-year shelf life. Protect from contamination and use appropriate safety gear during application. Per piece.

- Ensures optimal performance for polyester-based putties
- Red colour aids in precise application and mixing
- 1-year storage stability for consistent results

GAP 51

HARDENER WHITE - 30 G

DEB 51 is a white BPO hardener designed for use with DEB 12, sharing similar properties with the red GAP 51 hardener. It can also be mixed with other polyester putties in our range. Essential when using DEB 12, it prevents bleed-through issues with primers and colours that may occur with red BPO hardener. Per piece.

- Perfect for colour-sensitive finishes
- Works with DEB 12 and other putties
- Ideal replacement for red hardener

DEB 51

UV PUTTY COARSE

Ready-to-use UV Putty Coarse for filling small cracks, dents and stone chips. Extremely fast drying. 190 g. per tube.

- Ready to use; no need to add a hardener
- Easy dosing thanks to the tube
- Smooth application

915020

UV PUTTY FINE

Ready-to-use UV Putty Fine, to fill even the slightest micro-holes. Extremely fast drying. 220 g. per tube.

- Ready to use; no need to add a hardener
- Easy dosing thanks to the tube
- Smooth application

915011

UV PUTTY TRANSPARENT

Transparent, fast-curing putty for rock chip repairs. Easy to apply on metal and plastics, cures in 5 seconds, and is ready for processing. 50 g.

- Ready to use; no need to add a hardener
- No shrinkage
- 3 bottles + 100 x 1.0 mm Touch-Up Sticks per box

915033

UV PUTTY - 500 G

A universal polyester UV putty ideal for spot and smart repairs on metals and plastics (with adhesion promoter). Dries in 2-5 minutes with no mixing required. Easy to sand, with excellent finishing and flexibility. Convenient 500 g cartridge for precise application and minimal waste. Per piece.

- Universal UV putty
- The product is chemically stable after curing; no marks, does not sink and does not shrink
- Can be used on most metal surfaces

UV Curing Light
Art.no. 9000

UV CURING LIGHT

To ensure profitability and streamline work processes, UV curing technology is being used more and more in various paint processing markets. The technology enables you to work faster and more efficiently, while significantly reducing curing time between process steps. The Colad Fast Curing UV Light can be used to cure UV curing putties, UV curing paints and UV curing primers and body fillers on both small and larger areas.

Colad

UV CURING LIGHT

UV curing device for curing UV curing putties, UV curing paints and UV curing primers and body fillers on both small and larger areas. Per piece.

- App. 300 mW/cm² UV LED
- The safest solution available in the UV-A spectrum
- Easy to operate due to its high-tech, lightweight, ergonomic design

9000

FINIXA

UV CURING LAMP

High-performance UV-A lamp (395 nm) with 55 μ W/cm² at 20 cm for fast, precise curing of UV paints. Features active cooling, distance control, LCD display, and wall-mounted charger for convenience. Per piece.

- Super-fast curing times
- Powerful irradiance with maximum UV-A intensity of 55 μ W/cm² at 20 cm
- Successfully tested on UV paint products from all major paint manufacturers

UVL 00

FINIXA

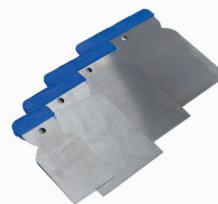

TRIPOD FOR UV CURING LAMP

Enhance the functionality of your UV Curing Lamp (UVL 00) with our convenient Tripod accessory. This handy tripod is designed to provide stability and support for longer exposures during the curing process. Per piece.

- Accessory for UVL 00
- Handy tripod for longer exposures

UVL 01

**Colad****JAPANESE PUTTY KNIVES**

Japanese knives for spreading putty. Made of first class quality steel; very flexible, with grip. Per set of 4 pcs in different sizes (50 - 80 - 100 - 120 mm).

- First class quality steel
- Very flexible
- Including support

9100**Colad****PLASTIC SPREADER**

These spreaders are specially designed for the application of putties. Use the flexible (red) spreader for use on flat surfaces. Use the super flexible (black) spreader for use on curved ones. Made of plastic to avoid scratch in the surfaces, with flattened spread-edge, including grip. Size: 120 x 90 mm.

- Red = flexible, black = super flexible
- Made of plastic to avoid scratch in the surface
- With flattened spread-edge including grip

- Flexible
- Smooth finishing
- Colour: Brick red

9130

MIXING BOARD

Multi-layered board for smooth, pinhole-free putty mixing. Made from non-absorbing treated paper to prevent resin and hardener absorption. Tear off used sheets for easy cleanup. Per 100 sheets.

- Prevents pinholes during application
- Non-absorbing treated paper ensures perfect mixing
- Reduces cleanup with disposable sheets

GAP 60

PLASTIC SPREADERS

Plastic Disposable Spreaders. Set of 25 in a dispenser box (116 mm x 78 mm) for smooth, efficient, and uniform application. Convenient and versatile for various tasks.

- Plastic disposable spreaders
- Dimensions: 116 mm x 78 mm
- 25 pcs

PPM 25

FLEXIBLE METAL SPREADER

This set includes flexible spreaders in four different widths: 50 mm, 80 mm, 100 mm, and 120 mm. These metal spreaders are designed to provide versatility and reliability, ensuring smooth and even spreading of various substances. Per set of 4 pieces.

- Flexible metal spreaders
- One set is made up of 4 different widths: 50 mm, 80 mm, 100 mm and 120 mm

PPM 20

RUBBER SPREADERS

Rubber Spreaders, set of 20 flexible rubber spreaders with a soft finish and unique shape, ideal for reshaping on complex contours and working on intricate surfaces.

- Flexible rubber spreaders with soft finish
- The unique shape allows the spreader to be used to reshape more complex contours
- 20 pcs

MASKING TAPE GOLD

The next generation solution for automotive painting. This versatile tape is compatible with all water- and solvent-based automotive paints, ensuring reliable performance. With its solvent- and water-resistant properties, it provides excellent adhesion on various surfaces, including plastic and rubber. The ultra-thin Japanese flat paper carrier allows for easy application in soft curves, making it a time-saving alternative to fine line tape during disassembly and assembly. Rest assured, it leaves no traces of glue, even on polycarbonate surfaces of headlights and taillights.

MASKING TAPE GOLD 100°

Flawless paint lines applications with our premium rice paper masking tape. Its thin, tear-resistant washi backing ensures minimal paint bleed, effortless adaptation to curved surfaces, and clean removal without residue. Designed for higher temperature tolerance, this tape delivers professional-quality results on every job. Can be used with both water- and solvent- based paints. Rolls of 50 m.

- Thin washi backing ensures minimal paint bleed and exceptional precision
- Tear-resistant and heat-tolerant for reliable performance on curved surfaces
- Removes cleanly without residue, guaranteeing a professional finish

LIFTING TAPE 'MULTI'

This versatile masking tape features two different-sized plastic strips, making it suitable for various vehicle masking needs. With this tape, you can accomplish three different applications: single strip, double strip, or both strips folded together between rubber and panel. 9, 12, 20 mm x 10 m. Per roll.

- The tape and strips are perforated every 42 mm
- Masking tape with two different sized plastic strips
- Use one tape for three different applications

FOL 501MT

LIFTING TAPE

Featuring a 10 mm plastic strip, this tape simplifies the process. Just place the strip between rubber and panel, then attach the tape to the window and pull away the rubber. Easily cut to size with scissors for precise masking. 10 mm x 10 m. Per roll.

- For masking around windscreens
- Easily cut to size with scissors
- With a 10 mm plastic strip

FOL 51

LIFTING TAPE 'EASY TEAR'

Masking tape with 10 mm plastic strip for masking around wind screens. Simply place the plastic strip between rubber and panel and then pull away the rubber from the panel by attaching the tape to the window. The tape and strips are perforated every 46 mm, so they can be torn by hand. 10 mm x 10 m. Per roll.

- With 10 mm plastic strip for masking around wind screens
- Perforated every 46 mm so easy to tear
- Easy to use

FOL 51ET

JOINT STOPPER

The quickest and easiest solution for masking door apertures and vehicle gaps before primer application. This innovative product seals and protects jambs from overspray, preventing primer build-up on panel edges. With precise fingertip adjustment and a unique 8-shape design that stays fixed during spraying, it ensures a clean and efficient process. Per roll.

- The easiest and fastest way to mask door apertures and other vehicle gaps before primer application
- Seals and protects jambs from overspray
- No primer build-up on panel edges

MIXING CUPS

Our high-quality mixing cups are specially designed for precision and ease of use. With optimized aspect ratios, you can count on highly accurate mixing results, while the clearly readable mixing ratios on the inside ensure effortless reading and flawless dispensing. With a choice of 10 different mixing ratios and available in 6 convenient sizes - from 400 ml to as much as 5000 ml - these cups offer the versatility you need for any project.

The cups feature non-slip feet that protect against cold transfer during mixing, and smart stacking supports allow for easy separation and storage. Made of winter-resistant plastic, they can withstand extreme temperatures.

PRINTED MIXING CUPS

Designed for precise mixing with clear printed ratios, these durable, winter-proof cups are available in 400 ml to 5000 ml sizes. Features bottom feet for cold protection and stacking supports for easy use. Per box.

- Optimized height-width dimensions for more accurate mixing
- Clearly printed and readable from the inside mixing ratios
- 10 different mixing ratios

Turbomix™ Paintsaver™
Paint Stirrer
Art.no. 9500

TURBOMIX™ PAINTSAVER™

Thanks to the innovative and patented z-shaped design with uniquely shaped holes, the Turbomix™ Paintsaver™ is now capable of 30% faster stirring, which increases to almost 40% with metallic paints.

The built-in 'break it to save it' system ensures any excess paint is effortlessly removed from the Turbomix™ Paintsaver™ before disposal (up to 5-7 grams per use). Break it before you mix to save paint and pigments.

**Colad****TURBOMIX™ PAINTSAVER™**

Achieve perfect paint consistency faster with reduced paint waste. Break it before you mix to save paint and pigments. Features a 22 cm ergonomic stirrer, ideal for mixing cups up to 1400 ml. Comes in a dispenser of 512 pieces.

- Perfect consistency and pigment blend
- Save up to 40% mixing time with metallic paints
- Save up to 30% mixing time with conventional paints

9500

Colad**TURBOMIX™ PADDLES XL**

Plastic paddle made from recycled synthetic material. Easier stirring and better mixing due to the curved shape and holes. Dimensions: 30 x 3 cm, suitable for mixing cups of 1400 or 2300 ml. 200 pieces in a dispenser box.

- Suitable for larger type mixing cups
- Perfect consistency and pigment blend
- Extra strong

9520200

**FINIXA****MIXING PADDLES PLASTIC 20 CM**

Enhance your paint mixing efficiency with Finixa's Mixing Paddles. The unique S-shape design, available in a 20cm length, facilitates faster and more precise paint mixing compared to conventional methods. The black color enables a pre-color check during mixing, ensuring accuracy. Finixa's mixing paddles MPP 0250 comes in a dispenser box containing 250 mixing paddles.

- The S-shape of the MPP has the advantage that it mixes paint faster and preciser than conventional methods
- 20cm S-shape paddle
- Black color will allow to do a pre-colour check while mixing

MPP 0250

FINIXA**MIXING PADDLES PLASTIC 30 CM**

30 cm paddles with an S-shape design for faster, precise mixing. Features a solid grip and black color for pre-color checks. Comes in a box of 200 paddles.

- The S-shape of the MPP has the advantage that it mixes paint faster and preciser than conventional methods
- 30 cm S-shape paddle with a solid hand grip
- Black color will allow to do a pre-colour check while mixing

MPP 0200

**FINIXA****MIXING PADDLES PLASTIC 23 CM**

Experience enhanced paint mixing with our Mixing Paddles. Crafted with a straight design for easy paint removal from mixing cups. Our paddles feature recycled polypropylene for added firmness and sustainability, reducing waste. Enjoy a modern touch with the engraved Finixa logo.

- Due to the straight shape of the plastic mixing paddle, it is easy to remove paint from the mixing cup. Length: 23 cm.
- GAC 0250: Box containing 250 mixing paddles
- GAC 1000: Box containing 1000 mixing paddles

Spray Sample Cards

Art.no. SSC XX

SPRAY SAMPLE CARDS

These Spray Sample Cards are developed to meet the diverse needs of professionals while supporting eco-friendly practices. They have a versatile coating compatibility, making them suitable for precise colour matching of both water-based and solvent-based coatings.

The user-friendly, flexible design with convenient sizes comes with a Ø 15 mm hole and central coverage guide in five essential colour degrees, making it easy to determine the degree of coverage. The cards don't have sharp edges, preventing damaging the surface during the work process. They are produced from plasticised paper and contain 15% recycled material.

NEW

Colad

SPRAY SAMPLE CARDS

Spray Sample Cards made out of plasticised paper. Equipped with a Ø 15 mm hole and central line to determine the coverage. Flexible and lightweight. Per set of 250 pcs.

- Suitable for water- and solvent-based coatings
- Convenient 10 x 15 cm size with Ø 15 mm hole and coverage guide
- Made with 15% recycled material

FILING SYSTEM FOR SPRAY SAMPLE PLATES

Our Sample Plate Filing System is designed for efficient organization of up to 250 SSP sample plates, with or without envelopes. Includes a plastic filing box equipped with 6 dividers, 88 blank labels and marker for convenient note-taking. Per piece.

- Filing system for 250 SSP sample plates with or without envelope
- System carries one plastic filing box with 6 adjustable dividers, 88 blank labels and a marker to make notes on the back of the plates

SSP 40

DRYING OVEN FOR SPRAY SAMPLE PLATES

Designed for ease of use with both water and solvent-based paints. Simply connect it to the power supply for efficient drying of your spray samples. Streamline your process and ensure optimal results with this convenient drying solution. Per piece.

- Drying oven for spray samples
- Easy to use
- Can be used with water and solvent-based paints

ILO 20

HOLDER AND STAND FOR SPRAY SAMPLE PLATES

Designed for hands-free handling of SSP spray samples. The set includes a convenient magnet holder (fork) and a stable magnet stand, providing a secure and practical solution for displaying and managing your spray samples effortlessly. Per piece.

- Magnet holder (fork) and magnet stand for hands-free handling of the SSP spray samples

SSP 50

3D SPRAY SAMPLE PLASTIC

Perfect for testing 'special effects' colors, this spray sample's intricate shape allows operators to assess paints from all angles. It is available in black. Per 35 pieces.

- For test spraying 'special effects' colours
- The complex shape of the spray sample allows the operator to check paints in all angles
- Dimensions: L 230 mm x W 130 mm x H 45 mm

DDD 00 Black

EASY2CHECK®

The most efficient and effective product to check for any irregularities while sanding panels. The 'glossy finish' helps detecting any defects or colour deviations. Spray the panel after the sanding process to check repaired surfaces on irregularities. Can also be used for spray sample checks! 400 ml per spray can.

- Checks repaired surfaces
- Checks for any irregularities while sanding panels
- Detects any defects or colour deviations

9300

DISPOSABLE PAINT CUPS

Plastic disposable paint mixing cups of 2.3 L. For quick exchange of paint types or colours for the house painter. Disposable paint cups suitable for paint mixing and painting, can be combined with the Colad Metal Paint Buckets.

- Quick exchange of paint and colours
- Suitable for paint mixing and painting
- Ideal paint cups for the house painter

9440 Box of 100 cups (2300 ml)
+ 4 Metal Paint Buckets

9450 Box of 36 Metal Paint
Buckets

TOUCH UP PAINT BOTTLES

Provide your client with a paint specimen so that they can touch up minor damage themselves. 100 touch up bottles 30 ml, 100 lids with built-in brush, 200 metal mixing balls to obtain thorough mixture, self adhesive labels for your companyname and a funnel.

- Portable solution for minor damages
- Suitable for small paint samples
- Clients can touch up small damages themselves

9186

CHECK LIGHT 2.0

A versatile LED work light with a CCT scan is suitable to preform colour matching and detect scratches and defects. Perfect colour recognition through stepless dimming light power allows you to simulate a full day of lighting from sunrise to sunset. Per piece.

- Fast and easy recognition of irregularities
- Perfect colour recognition
- Easy to handle due to the light weight

9332

INSERT CUP 2.5 L

Always a clean Insert Cup for quick and easy change of paint colour or paint type. Equipped with extra wide, smooth edge to remove access paint from paint brush. Content 2.5 L. 150 pieces per box.

- Extra wide, smooth edge
- For quick and easy change

9435150

DISPENSER BOTTLE 1000 ML

1000 ml plastic bottle for dispensing special diluent to waterborne coatings. Equipped with a fine, "drop by drop" nozzle. Inner neck diameter: ± 21.5 mm. Per bottle.

- Perfect for dispensing special diluant
- Drop by drop nozzle

9700

BLACK STORAGE CUP WITH LID

Black cups are not transparent and ideal to store and transport „UV sensitive“ coatings like UV primer/fillers or water-based basecoats. Each cup is supplied with an airtight sealing lid and suitable for transportation of ready mixed colours. Available in 5 versions. Per piece.

- Ideal for UV sensitive coatings
- Fit to store water-based paint for months
- Suitable and tested for road transport of water-based paints

TOUCH-UP BOTTLES 20 ML

These plastic bottles come with a screw cap and an integrated brush, providing a convenient tool for small-scale paint applications. The glass ball inside is compatible with both water- and solvent-based paints. Per 100 pieces.

- Plastic bottles with lid and integrated brush for quick light duty touch ups
- The bottle contains a glass mixing ball making it perfectly usable for both water-based and solvent-based paints
- Completely transparent

TUB 61

PIPETTE 3 ML

The perfect tool for precise pigment control in your mixtures. Whether you need to remove excess pigment or add liquids with precision, this tool is designed to meet your needs. Per 500 pieces.

- Precisely remove any excessive pigment from a mixture
- Can also be used to precisely add liquid to mixture

PIP 03

TOUCH-UP BOTTLES 50 ML

Safely store leftover paint with this 50ml plastic touch-up bottle, featuring a childproof cap and built-in brush. An internal glass mixing ball is fully compatible with water- or solvent-based formulas, ensuring effortless blending. Its semi-transparent design and printed volume ratios simplify precision, making every repair quick and reliable. Per 60 pieces.

- Plastic bottle with safety cap and integrated brush to touch up car paint
- The glass ball inside the bottle is compatible with both water- and solvent-based paints
- Semi-transparent with volume ratio printed on the bottle

TUB 60

DISPENSER BOTTLE 1000 ML

Convenient 1 L bottle equipped with a siphon for precise liquid dispensing. This tool is designed to facilitate the accurate addition of substances such as distilled water to water-based base coats. Simplify your mixing processes and ensure precision with the Finixa Siphon. Per 6 pieces.

- 1 L bottle with siphon to accurately add liquid to a mixture like distilled water into water-based base coats

Green Paint System

Art.no. GPS 650125 - 650190

Save time in the
spray booth

Ensure flawless
finish

Save paint

40-50% less plastic

For water- and
solvent-based paint

GREEN PAINT SYSTEM

The GPS saves you time in the spray booth. In comparison to LDPE, the ultra-thin PET-liner collapses faster and more efficiently. This leads to a superior spray pattern and less time spent on the paint job.

The flexible ultra-thin PET-liner is designed to have minimal friction with the paint, which results in more paint flow, a flawless finish and a smooth experience throughout. PET ensures minimal friction with the paint, is more chemically resistant than LDPE.

The overall ingenious design of the GPS leaves less paint residue in the liner, which maximizes the paint used and saves you paint. It not only helps you achieve the best possible result and flawless paint jobs, it also reduces the weight of plastic waste.

GREEN PAINT SYSTEM

A Belgian-patented, eco-friendly solution with a 50% thinner PET-liner for precise mixing and faster paint release. Features a reusable outer cup, 10 mixing ratios, lightweight lid with strainer, and closing cap for easy paint storage. Comes in a wall-mountable dispenser box. Per box. Includes 50 lids - 50 pet-liners - 1 outer cup - 20 closing caps.

- In house development: Belgian patented product
- Sustainable production: our goal is to reduce waste
- Ultra thin PET-liner: up to 50% thinner compared to traditional systems

GPS 650125 125μ

GPS 650C Reusable outer cup

GPS 650190 190μ

CLOSING CAPS FOR GREEN PAINT SYSTEM

Easily store leftover paint with the GPS 00 Closing Cap. Designed for the Green Paint System, it provides a secure seal to preserve paint for future use, minimizing waste and enhancing convenience. Each pack includes 20 caps for efficient storage solutions.

- Preserves Paint: Airtight seal to keep paint fresh for reuse
- Eco-Friendly: Minimizes waste by reducing leftover disposal

SPRAY GUN CLEANING KIT

17-piece kit for cleaning spray guns, including brushes and needles to clean fluid tips, air caps, passages, and exteriors. Perfect for removing paint from small parts. Per kit.

- 17 tools for thorough spray gun maintenance
- Suitable for various spray gun brands and airbrushes
- Lightweight blister pack for easy storage and portability

8817

PAINT TOUCH-UP STICKS

The Paint Touch-up Sticks are an excellent tool for retouching small spots where the paint is damaged and needs a very minor paint repair. The tip of the stick is lint-free and made of non-absorbing fibres. The sticks can also be used for removing dust and cleaning very tiny car parts. 100 pieces per tube/4 tubes in 1 box.

- For most accurate application of small paint repairs
- The tips have a flexible head that can be bent slightly
- Packed in a transparent dispenser to make it easy to identify the right size by colour

9910 1.0 mm

9915 1.5 mm

9920 2.0 mm

**Colad****SPRAY GUN HOLDER**

Holder to store away your spray gun with paint cup.

- Rigid construction
- Suitable for both gravity feed and suction feed spray guns
- Solid, very stable ground plate

103511

**Colad****SPRAY GUN HOLDER**

This metal Spray Gun Holder is suitable for storing two spray guns and can be used for both suction and gravity feed spray guns. The Spray Gun Holder comes with two powerful magnets and therefore can be placed on the metal walls in your spray booth. Thanks to these magnets, the holder is easy to move to another place in your spray booth. Per piece.

- Magnetic and therefore easy to place on the walls of your spray booth
- Easy to move to a convenient place in your spray booth
- Suitable for two spray guns

000830

**Colad****DUST NEEDLE SET**

The ultimate tool for removing lint, dirt, and dust from wet paint without damaging the surface. Includes a plastic pen/holder and 10 microfne hooked needles for precise cleaning. Per set.

- Removes dust effortlessly without damaging wet paint
- Microfne hooks ensure surface tension closes cavities automatically.

9800 Set

9810 Refill needles

**Colad****CAR DETAILING BRUSH SET**

For precise application and touch-up tiny quantities of paint and coatings for automotive projects. The set contains 36 brushes in 3 types. The types are no. 1, no. 2 and no. 3. There are 12 pieces per type. Per set.

- With the 3 sizes you can cover a wide variety of automotive detailing work
- Each brush is made of natural (pony) hair for smooth and precise application of paint and coatings
- Hair is strong material and can be cleaned and used more than once

9900

**hamach****BLOW OFF NIPPLE**

Blowing gun to eliminate dust over surface. Covered by rubber to protect the surface. Air connection 1/4". Per piece.

- Air connection: 1/4"
- Eliminate dust from your surface
- Per piece

000882

**Colad****COMPRESSED AIR NOZZLE WITH VALVE**

Effortlessly direct compressed air with precision using the Colad Compressed Air Nozzle with Valve. Ideal for drying, cooling, and dust removal during paint preparation. Per piece.

- Adjustable nozzle for targeted application
- Saves time and reduces air usage
- Perfect for dust removal and curing acceleration

10900

10 L PRESSURE TANK

10 L pressure tank set with 10 m hose and 1.8 mm spray gun, perfect for applying large volumes of paint, primer, or cabin protection with precision and ease. Per piece.

- Includes pressure tank, 10 m hose, spray gun, and regulators for immediate use
- Perfect for buses, trucks, vans, and spray booths
- Equipped with pressure gauges and fluid regulators for accurate application

SPG 80

SPRAY GUN + NOZZLE 1.8 MM FOR SPG 80

Spray gun compatible with SPG 80, equipped with a 1.8 mm nozzle for precise and even paint application. Per piece.

- Designed specifically for SPG 80 spray systems
- 1.8 mm size for smooth and accurate paint delivery
- Durable construction for consistent performance

SPG 81

SET HOSES FOR SPG 80 - 10 M

The Set of Hoses for SPG 80 is designed for optimal product flow, featuring a 10 mm inner diameter and a convenient 10 m length. This set ensures efficient and flexible use with your SPG 80 spray gun system.

- Set of hoses for SPG 80
- 10 mm inner diameter for more product flow
- Length: 10 m

SPG 82

SPRAY GUN SPOT REPAIR 100 ML, NOZZLE 0.8 MM

Lightweight and precise, this LVLP mini spray gun ensures 74% transfer efficiency with minimal overspray. Features a 0.8 mm nozzle, 100 ml cup, and compatibility with water- and solvent-based paints. Per piece.

- Comfortable grip for prolonged use
- Minimal overspray, maximum transfer efficiency
- Over 74% effective transfer efficiency

SPG 100

Spray Gun

SPRAY CASE

A complete solution for professional spraying, featuring three SPG spray guns (2 x 1.3 mm & 1 x 1.8 mm nozzles), a standard cup, FPS adaptors, mixing cups, and lids. Customizable with additional nozzle sets. Per piece.

- Professional spraying solution
- Three SPG 500 LVLP spray guns included
- 1.3 mm and 1.8 mm nozzles for versatility

SPG 60

MAINTENANCE KIT FOR SPG 700

Comprehensive maintenance kit for SPG 700 mini spray gun, including essential components to ensure optimal performance and longevity. Per kit.

- Contains all necessary parts for regular upkeep of the SPG 700
- Keeps your spray gun in peak condition for extended use
- Designed specifically for the SPG 700 mini spray gun

SPG 710

PATTERN CONTROL ASSEMBLY FOR SPG 700

Pattern control assembly for SPG 700 mini spray gun, ensuring precise spray pattern adjustment and maintaining optimal performance. Per set.

- Enables accurate spray pattern adjustments for spot repair
- Designed specifically for the SPG 700 mini spray gun
- Made with high-quality materials for reliable and long-term use

SPG 730

PRESSURE REGULATOR FOR SPG 800-900

Ensure precise and consistent pressure control with this regulator, designed specifically for SPG 800 and SPG 900 spray guns. Per piece.

- Ensures optimal spray gun performance
- Designed for SPG 800 and SPG 900 models
- Built to withstand regular use in demanding environments

SPG 920

AIR CONTROL ASSEMBLY FOR SPG 700

Air control assembly for SPG 700. Per piece.

SPG 720

MAINTENANCE KIT FOR SPG 800 - 900

Comprehensive maintenance kit for SPG 800 and SPG 900 spray guns, designed to ensure optimal performance and prolong the lifespan of your equipment. Per kit.

- Contains all necessary parts for maintaining SPG 800 and SPG 900 spray guns
- Keeps your spray gun in peak condition for extended use
- Designed specifically for SPG 800 and SPG 900 models

SPG 910

NOZZLE SET FOR SPG 100 0.8 - 1.2 MM

This set includes a nozzle, needle, and aircap, allowing you to choose from different sizes (0.8 mm, 1.0 mm, 1.2 mm) to meet your specific spraying needs. Upgrade your SPG 100 spray gun for optimal performance in various applications. Per set.

- Nozzle set for SPG 100 spray gun
- Includes nozzle, needle and aircap
- Available sizes: 0.8 mm, 1.0 mm, 1.2 mm

SPG 100K0.8 0.8 mm

CLEANING KIT FOR SPRAY GUNS

All-in-one cleaning kit with brushes, needles, and lubricant for thorough spray gun maintenance and optimal performance. Per set.

- Includes 8 interior brushes, 3 small brushes, a large exterior brush, and 6 nozzle needles
- Features tools for detailed nozzle and part cleaning
- Comes with a lubricant bottle to maintain moving parts effectively

MAK 00

SPRAY GUN SUPPORT WITH MAGNET BACKING

This support features a powerful magnet that can securely hold 2 filled spray guns. It's easy to replace and helps keep your airlines clean and off the floor, making your workspace more organized and efficient. Per piece.

- Very strong magnet, holds 2 filled spray guns
- Can easily be replaced
- Keeps your airlines clean and off the floor

EQU 85

STRAINERS FOR GRAVITY FED SPRAY GUNS 275 MICRON

These plastic filters are designed to be placed in the intake tube of your upper cup spray gun. Each set includes 10 filters with a 275 µm mesh size. Keep your spraying equipment performing at its best with ease. Per 10 pieces.

- Plastic paint strainer designed for placement inside the suction channel of the gravity cup of a spraygun.
- 275 µm - 10 pcs

BBF 10

SURFACE PREPARATION - 1 L

Cleaner and degreaser for surface preparation. Extremely effective surface cleaner, with ingredients that remove grease, polishing compounds, wax residues and other contaminants as well as special additives that help to promote the adhesion of Colad Ceramic Protection. Per bottle.

- Extremely effective surface cleaner
- Deep cleaning of the surface
- Removes residues of polishing compounds and wax

9067

CERAMIC PROTECTION

Colad Ceramic Protection is a silicon-free ceramic coating, developed with the latest Sio2-based technology. 9H hardness, extended application time and UV light application control. It creates a sealed layer that protects the treated surface against environmental agents, and makes it easy to clean, scratch resistant and hydrophobic. Per set.

- Included Microsuede Applicator Pad for fast and smooth application
- Never miss a spot due to the UV light application control
- Can be used on any painted surface

9068

MICROSUEDE APPLICATOR PAD

Colad Foam Applicator Pad consists of a foam pad covered with a low-absorption microsuede fabric, with the Colad logo embossed in low relief. The pad is designed for the application of liquid and paste products of different viscosities, preventing scratching of the surface. Use of the pad is recommended when applying Colad Ceramic Protection. 9 x 6 x 3 cm. Per 6 pieces.

- Smooth application due to the ergonomic design
- Low absorption of material to optimize use of the products
- The soft microsuede prevents scratching of the surface

Electric Polisher

Art.no. POL 55

**Flawless finishes****Lightweight,
ergonomic design****5M****Cord wired**

ELECTRIC POLISHER

With a 2:1 transmission providing high torque at low RPM, this polisher is designed for efficiency and optimal results. Its improved cooling-ventilation system ensures durability during extended use. The adjustable speed, ranging from 700 to 2500 RPM, gives you control over various polishing applications.

Weighing just 2.6 kg, this lightweight polisher offers easy and comfortable handling. The package includes a backing pad (POL 56), side handle, and spare carbon brushes, making it a comprehensive solution for your polishing needs.

ELECTRIC POLISH MACHINE 1050 W 700 - 2500 RPM

High-torque polisher with a 2:1 transmission for low RPM efficiency (700-2500 RPM). Features an improved cooling system for durability and weighs just 2.6 kg for easy handling. Includes backing pad (POL 56), side handle, and spare carbon brushes. Per piece.

- 2:1 transmission for powerful, precise polishing
- 700-2500 RPM for versatile applications
- Improved cooling system for extended use

POL 55

PNEUMATIC POLISHER 1200 - 2400 RPM

This versatile tool features a special speed control function, giving you the flexibility to regulate the speed between 1200 and 2400 RPM. Whether you're working on intricate details or larger surfaces, this pneumatic polisher delivers optimal performance. Please note that the backing pad is not included, providing you with the opportunity to customize your setup according to your specific polishing needs. Per piece.

- 1200-2400 RPM for precise control
- Weighs just 0.7 kg for easy handling
- Operates at 6.2 Bar (90 psi) for reliable performance

POL 50

ELECTRIC POLISH MACHINE HD - 1500 W 700 - 2500 RPM

Boasting a mighty 1500W motor and adjustable speed ranging from 700 to 2500 RPM, this tool is your go-to for robust polishing tasks. Weighing just 3.7 kg, it ensures comfortable handling while delivering exceptional results. The package includes a backing pad, side handle, and carbon brushes, making it a compact yet powerful solution for heavy-duty polishing needs. Per piece.

- 1500W
- 2:1 transmission: high torque at low RPM
- Adjustable from 700 up to 2500 RPM

POL 80

POLISHING CASE - ELECTRIC POLISHING MACHINE

Complete polishing kit including the powerful 1050W Electric Polisher (POL 55), with adjustable speed. Complete set for a flawless finish.

Per kit: 1 electric polisher (POL 55), 2 bottles of one-step polishing compound (POL 10), 2 red pads (POP 314), 2 open-cell structure orange pads (POP 714), 2 closed-cell structure white pads (POP 514), 2 soft black finishing pads (POP 914), 5 microfiber cloths (POL 40)

POL 60

POLISHING CASE + MHW + ELECTRIC POLISHING MACHINE

Complete polishing kit including the powerful 1050W Electric Polisher (POL 55), with adjustable speed. Complete set with Machine/Hand Wax (MHW 05) for a protective, high-gloss finish.

Per kit: 1 electric polisher (POL 55), 1 bottle of one-step polishing compound (POL 10), 1 bottle of machine/hand wax (MHW 05), 2 red pads (POP 314), 2 open-cell structure orange pads (POP 714), 2 closed-cell structure white pads (POP 514), 2 soft black finishing pads (POP 914), 5 microfiber cloths (POL 40).

POL 62

SUPPORT PAD M-14 HOOK AND LOOP Ø 160 MM

Support Pad M-14 Hook and Loop, designed for secure attachment of foam pads for efficient polishing. Per piece.

- Sturdy M-14 screw connection ensures stability during use
- Works with Foam Pads 010053, 010054, and 010055
- Ø 160 mm diameter for efficient polishing performance

010034

SUPPORT PAD M-14 HOOK AND LOOP Ø 115 MM

Support Pad M-14 Hook and Loop, ensures secure foam pad attachment for precise polishing tasks. Per piece.

- Ø 115 mm diameter for detailed and precise polishing
- M-14 screw compatibility for stable use
- Designed for Foam Pads 010050, 010051, and 010052

010037

SUPPORT PAD 5/8 HOOK AND LOOP Ø 160 MM

Support Pad M-14 Hook and Loop, designed for secure attachment of foam pads during polishing. Per piece.

- Ø 115 mm diameter for precision polishing
- M-14 screw ensures stability and reliability
- Suitable for Foam Pads 010050, 010051, and 010052

010038

FOAM PAD MEDIUM Ø 76 MM

Medium-hard foam pad for small, precise polishing tasks. Sold individually in a protective bag.

- Compact Ø 76 mm size for precision work
- Medium hardness for versatile use
- Long-lasting, professional quality

010057

**Colad****FOAM PAD HARD**

Foam Pad Hard, ideal for fixing minor scratches using a rotating polishing system with Step 1 polish. Available in Ø 150 and Ø 190 mm. Per piece.

- Designed for heavy-duty polishing to eliminate minor scratches
- Durable hard foam pad for precise results

010050 Ø 150 mm

010053 Ø 190 mm

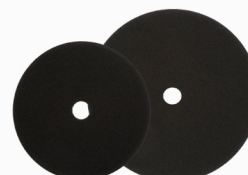

**Colad****FOAM PAD MEDIUM**

Foam Pad Medium, Ø 150 mm, designed for polishing old paints and restoring areas without gloss. Ideal for professional use. Per piece.

- Perfect for reviving dull and aged paint surfaces
- Made with high-quality foam for consistent polishing performance
- Compatible with Ø 150 or Ø 190 mm support pads for optimal performance

010051 Ø 150 mm

010054 Ø 190 mm

**Colad****FOAM PAD SOFT**

Foam Pad Soft, Ø 150 or Ø 190 mm, ideal for achieving the highest gloss on polished surfaces. Per piece.

- Designed for final polishing stages to deliver a mirror-like shine
- Prevents scratches and swirl marks, ensuring a flawless result
- Works seamlessly with 150 or 190 mm support pads for professional applications

010052 Ø 150 mm

010055 Ø 190 mm

BACKING PLATE FOR POL 50-55-80 - Ø 120 MM - M14

Versatile Ø 120 mm backing plate with an M14 attachment, included with the purchase of our polisher. Its flexible design enables polishing flat surfaces and edges with localized pressure while maintaining flatness. Compatible with most electric polishers. Per piece.

- Handles flat surfaces and edges effortlessly
- Fits most electric polishers
- Allows localized pressure without losing pad flatness

POL 56

BACKING PLATE - Ø 120 MM - BSP 5/8

Flexible Ø 120 mm backing plate designed for almost all electric polishers. Features a universal fit and flexibility for flat surfaces, edges, and angles, allowing precise pressure application without compromising flatness. Per piece.

- Compatible with most electric polishers
- Perfect for flat surfaces and edges
- Maintains pad flatness during polishing

POL 57

BACKING PLATE FOR POL 50-55-80 - Ø 80 MM - M14

Compact Ø 80 mm backing plate with an M14 attachment, designed for use with 80mm polishing pads. Universal fit for most electric polishers, including POL 50, 55, and 80. Per piece.

- Compatible with most electric polishers
- Designed for 80mm polishing pads
- Ensures precision polishing on various surfaces

POL 58

BACKING PLATE FOR POL 80 - Ø 180 MM - M14

This Ø 180 mm interface pad with an M14 attachment is designed to perfectly complement the POL 80 polisher. Achieve optimal performance and versatility during your polishing tasks with this quality backing plate. Per piece.

- Interface pad for POL 80 - Ø 180 mm - M14
- Included when polisher is purchased

POL 81

BLACK FOAM PAD 'SOFT'

Soft black foam pad Ø 130 mm with a handgrip Ø 100 mm for manual polishing or applying plastic renewal gel. Per piece.

- Comfortable handgrip for precise use
- Soft foam ensures smooth application
- Ideal for polishing or plastic restoration tasks

POL 33 Ø 130 mm

LAMBSWOOL PAD

This exceptional pad offers high cutting power, efficiently eliminating P2000 scratches and delivering a flawless finish. Choose from our range of sizes, including Ø 80/5 mm, Ø 135/5 mm, and Ø 175/5 mm, to suit your specific polishing needs. Per piece.

- High cutting power
- Removing of P2000 scratches

POP 108 Ø 80 / 5 mm

POP 117 Ø 175 / 5 mm

POP 114 Ø 135 / 5 mm

RED FOAM PAD

Engineered for high cutting power, this pad excels in removing P2000 scratches, ensuring a polished and smooth finish. Available in various sizes, including Ø 80/25 mm, Ø 145/30 mm, and Ø 180/30 mm, this foam pad is designed to cater to your specific polishing requirements. Per piece.

- High cutting power
- Removing of P2000 scratches

POP 308 Ø 80/25 mm

POP 318 Ø 180/30 mm

POP 314 Ø 145/30 mm

WHITE FOAM PAD

The White Foam Pad features a closed-cell structure that prevents product absorption, making it perfect for small, precise applications. Available in sizes Ø 80/25 mm, Ø 145/30 mm, and Ø 180/30 mm, it ensures efficient material removal for faster, high-quality polishing. Per piece.

- Closed-cell foam pad
- Same application as orange foam pad, does not absorb product
- Ideal for small applications

POP 508 Ø 80 / 25 mm

POP 518 Ø 180 / 30 mm

POP 514 Ø 145 / 30 mm

ORANGE FOAM PAD

The Orange Foam Pad features an open-cell design, providing a versatile and semi-rigid solution for large-scale polishing tasks. Available in sizes Ø 80/25 mm, Ø 145/30 mm, and Ø 180/30 mm, it delivers efficient performance for superior polishing results. Per piece.

- Open-cell foam pad
- Universal semi-rigid pad for most applications
- Ideal for large applications

POP 708 Ø 80 / 25 mm

1-STEP POLISH PASTE

Our 1-Step Polish Paste – a revolutionary solution for fast and efficient polishing. This water-based paste, suitable for both old and fresh paints, utilizes nanotech to deliver a glossy finish with a remarkable 95% gloss degree. Not only does it cut down polishing time by up to 50%, but it also eliminates the need for masks or gloves.

Its long-lasting “wet” composition minimizes the risk of dry powder residue, ensuring a clean and easy cleanup process. Ideal for various applications, from removing dust to refurbishing headlights, our 1-Step Polish Paste is your go-to for superior cutting power and an outstanding gloss on any paint surface.

UV STONE CHIP REPAIR - 20 G

A rapid UV-curing clear coat designed for efficient and cost-effective repairs of stone chips and scratches. This 1-component solution ensures fast curing without shrinkage, delivering a high-quality finish comparable to a 2K clear coat. Achieve the same strength, durability, and chemical resistance, with the added benefit of being sandable and polishable after just 45 seconds of curing using our Stone Chip Curing Lamp (SCL 00). Per piece.

- Fast UV curing clear coat for stone chip and scratch repair
- Fast, simple and cost effective repair of stone chips and scratches
- 1-component, fast curing

SCU 20

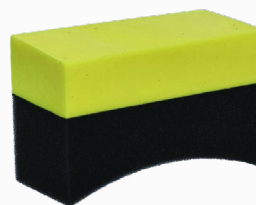

BLACK TYRE GEL - 500 ML

Black Tyre Gel rejuvenates tyres with a deep black shine that lasts. It's also perfect for restoring unpainted plastic parts. This water-based, silicone-free formula is easy to apply with the gel applicator sponge (POL 33) for a professional finish. Per bottle.

- Provides an intense, deep black gloss for tyres and plastic parts
- Ideal for both tyres and unpainted plastic restoration
- Water-based and silicone-free for eco-friendly application

BTG 05

BLACK TYRE GEL APPLICATOR SPONGES

Our applicator sponges are designed for the easy application of black tyre gel or plastic renewal gel. They not only save you time but also ensure efficient product usage. With their crescent shape, they provide quick and clean application on tyres, and their soft foam is suitable for interior applications as well, while the hard foam handle offers a secure grip. Per 12 pieces.

- Applicator sponge to apply black tyre gel or plastic renewal gel
- Saves time and product
- Crescent shaped for fast and clean application on tyres

BTS 12

BUCKET WITH SPOUT - 12 L

A durable 12 L bucket with a convenient pouring spout for efficient use. Optional anti-dirt grid prevents debris from being picked up by the sponge, ensuring cleaner results. Per piece.

- Built-in spout for precise liquid transfer
- Keeps dirt and sand at the bottom for a cleaner wash
- Ideal for car cleaning and other applications

BUC 12

ANTI-DIRT GRID FOR BUC 12

The perfect companion for the 12 L bucket, this grid prevents dirt and debris from contaminating your sponge or cleaning tools by trapping particles at the bottom of the bucket. Per piece.

- Built to withstand repeated use
- Keeps dirt and debris separated from cleaning tools
- Designed specifically for the 12 L bucket

BUI 12

CLEANING CLAY BAR (GREY)

Effortlessly eliminate bonded surface contaminants such as overspray, bug debris, road tar, rail dust, and fresh water spots. Restore your vehicle's smooth, glossy finish and prepare the paint for polishing or waxing. This non-abrasive clay bar is safe for clear-coat and single-stage paints, as well as glass, metal, and plastic. For the best results, pair it with our clean clay lubricant (CCL 10). Packaging: 2 x 100 g.

- Quickly and easily removes bonded surface contaminants like overspray, bug debris, road tar, rail dust and fresh water spots
- Restores a smooth, glossy finish
- Prepares the paint for polishing or waxing

CCB 00

CLEANING CLAY LUBRICANT - 1 L

Specially crafted for a smooth claying process, this lubricant makes it easy to remove adhered contaminants from your vehicle's surface. Say goodbye to scratches and hello to a smooth finish. After claying, your surface is ready for polishing or waxing. It's the perfect companion for your clay block, effortlessly removing tree resin and bird droppings. Safe and water-based, this 1-liter product ensures a scratch-free shine. Per bottle.

- Specially formulated lubricant for easy and scratch-free claying, preparing surface for polishing or waxing
- Lubricant for the clay process
- Clay block glides easily over the surface

CCL 10

CLAY PAD HOOK & LOOP Ø 150 MM

Effortlessly remove paint spray mist, resin, insect remains, old wax, and more with our Ø 150 mm diameter clay pad. It makes claying fast and easy, especially when used in combination with Finixa water-based degreaser. Ideal for use on orbital sanding machines at moderate speeds, and you can opt for the hook & loop adapter (CLP 16) for convenient hand use. Per piece.

- For fast and effortless removal of paint spray mist, resin, insect remains, old wax, etc.
- Use in combination with Cleaning clay lubricant (CCL 10)
- Makes claying fast and easy

CLP 15 Clay pad

CLP 16 Adapter for manual use

ALL IN ONE CAR SHAMPOO GREEN

Powerful cleaning with built-in wax protection for a glossy finish. Biodegradable and water-based, it works by hand or with a high-pressure cleaner. Mix 300 ml with 10 L of water for best results. Per can.

- Excellent cleaning power
- Top wax protection included
- Almost completely self drying

CSH 05 5 L

HEADLIGHT RENEWAL SET

Easily restore headlights with this all-in-one set, removing UV damage, yellowing, and stone chips. Improve light output, safety, and car value in just a few steps. Includes waterproof abrasives, an ammonia-free cleaner, and a 2K clear coat for professional results. Per set.

- Brings headlights back to their original state in just a few easy steps!
- Avoid costly replacements
- Increases light output and car value

HRS 00

CLEANING NEEDLE SET

Each set includes a convenient penholder and 10 replacement needles, individually packed in a blister. These needles feature microscopic hooks that effectively remove dust and dirt from wet paint surfaces. Crafted from durable aluminum, this set is your go-to for precision cleaning. Pen + 10 needles. Per can.

- A set contains one penholder with 10 replacement needles, individually packed in a blister
- The needles have microscopic small hooks which make it possible to remove dust and dirt from wet paint
- Made out of aluminum

CNS 00 Set

CNS 01 Replacement needles

DRY WASH

Clean and protect your car in one step without water or rinsing. Spray, spread, and buff for a streak-free, glossy, water-repellent finish with wax protection. One liter cleans 6-8 cars. Works best with two microfiber cloths. Per can.

- Waterless cleaning and protecting in one go
- Lifts and encapsulates dirt particles; no scratching, not even on dirty surfaces
- Twice as fast as normal washing; no water needed, no rinsing, no chalking

DRW 05 5 L

MANUAL SPRAYER - 1 L

Designed for extra-fine atomization and a larger spray surface. This economical solution is perfect for use with Dry Wash (DRW 05). With a 1-liter reservoir, it delivers efficient and precise application for your specific needs. Elevate your spraying experience with our Manual Sprayer. Per piece.

- Extra fine atomisation
- Larger spray surface
- Economical

LSP 30

MICROFIBER CLOTH GREY SOFT 40 X 40 CM

An extra soft and scratch-resistant solution for your cleaning needs. Designed for optimal performance, this cloth is perfect for use with Finixa Dry Wash and ideal for polishing dark surfaces. With dimensions of 40 x 40 cm and two different color stitches (2 red and 2 green), this pack of 4 cloths ensures a superior and efficient cleaning experience.

- Extra soft; less risk of making scratches
- Perfect in combination with Finixa Dry wash
- Perfect for polishing of dark surfaces

MFS 40

MICROFIBER CLOTH GREEN 40 X 40 CM

Experience the ultimate in surface care with our Super Soft Green Microfiber Cloths. This pack of 5 cloths is specifically designed for effortlessly removing polish residues and achieving a stunning gloss on surfaces. The super-soft microfiber material ensures a gentle touch, making it perfect for fine finishes.

- The super soft green microfiber cloths, packed per 5 pieces, are ideal to remove polish rests and to create a gloss on the surface

POL 40

MACHINE / HANDWAX - 500 ML

Protect and enhance paint with a deep gloss finish using natural and synthetic waxes. Long-lasting protection with a refreshing grapefruit scent. Per bottle.

- Protect your paint or polished work for a long time
- High-grade natural and synthetic wax components
- Deep gloss result

MHW 05

PLASTIC RENEWAL GEL - 500 ML

Specially formulated to nourish plastic and leather surfaces, this gel re-intensifies colours and imparts a natural gloss. The application is effortless with Finixa's hand foam pads POL 33, ensuring a smooth and even finish. Plus, this water-based gel is silicon-free, providing a rejuvenated look to your vehicle's interior without compromising on quality or safety. Per bottle.

- Plastic renewal gel nourishes plastic, leather interiors
- re-intensifying the colour leaving natural gloss
- Easy application with hand foam pad POL 33

PRG 05

SPRAY WAX - 5 L

Introducing our Spray Wax, featuring a unique formula that leaves no traces, even on windows. This versatile product can be applied directly to the panel for added gloss and protection, whether the surface is dry or wet. With no silicone content, it's safe for use in the body shop and aids in hologram removal after polishing. Per can.

- Unique formula, never leaves traces, not even on windows
- Can be used directly on the panel (dry) to add gloss and protection
- Also to be used on a wet washed car, to improve drying in combination with microfiber towels

SPW 05

MAXI DRY CAR TOWEL 60 X 90 CM

This double-sided cloth dries your car efficiently without wringing out, thanks to its superior composition of polyester and polyamide. Ideal for both dry and wet use, it acts as a powerful magnet for dust and dirt when dry and absorbs over seven times its weight when wet. Sized at 60 cm x 90 cm, it provides ample coverage. Conveniently packed individually for your ease. Per piece.

- Dries entire car without wringing, versatile dry or wet use

TWL 00

JUMBO SPONGE

The Jumbo Sponge is your ideal companion for cleaning cars, motorcycles, vans, and more. With highly water-absorbent properties and a soft structure, it ensures effective cleaning without causing any damage to the bodywork. Per piece.

- The green sponge with Microfiber skin will remove aggressive dirt
- Highly water-absorbent
- Soft structure will not damage bodywork

SPJ 00 Orange

SPM 00 Green

SOFT SILICONE BLADE

A soft silicone blade designed for swift and scratch-free water removal after vehicle washing. Its flexible design molds to any surface, ensuring a thorough and efficient drying process. This tool significantly reduces streaking by 80%. With a width of 33 cm, it's suitable for all surfaces, providing a quick and effective solution for maintaining a pristine vehicle appearance. Per piece.

- Soft silicone blade for removing water fast and easy after washing down a vehicle without harming the lacquer
- Works very fast
- Makes no scratches

WWB 00

**Colad****POLISHING WIPES**

These 100% viscose, biodegradable wipes polish all surfaces without scratches or residue. Perfect for painted surfaces, chrome, glass, and interiors, their non-woven design prevents fraying and lint. Comes in a handy dispenser box. 275 pieces on a roll.

- These wipes are ideal for the polishing of all chrome, glass and interior details
- Without any streak-producing additives
- Biodegradable

8880**Colad****MICROFIBER POLISHING CLOTHS**

Soft, lint-free microfiber cloths designed to remove polish residue for an ultra-smooth finish. Each pack contains four 40 x 40 cm reusable cloths, washable up to 500 times at 60°C. Bag with 4 pieces.

- Gentle on surfaces for streak-free results
- Reusable and washable up to 500 cycles
- Removes residue and moisture effectively

8800**Colad****MICRO POLISHING DISCS**

Universal Primer/filler

Art.no. TSP 110-120-130-140

UNIVERSAL PRIMER/FILLER

This versatile primer/filler is suitable for finishing with all solvent and water-based 1K and 2K paints. Perfect for a variety of surfaces, it's ideal for fast repairs after sanding too hard, spot or panel repairs, and smaller surfaces.

Apply fine layers for optimal results. The primer/filler sprays feature a special nozzle, providing a flat vertical pattern akin to a spray gun. Shake the can thoroughly before the first use for the best performance.

ONE-STEP UV PRIMER/FILLER - 400 ML

One-Step UV Primer/Filler eliminates the need for mixing and dries in just 1-2 minutes with the UV lamp (UVL 00). This innovative system enhances productivity, saves time, and works on multiple surfaces, including steel, aluminum, plastics, and OEM finishes. Perfect for spot and smart repairs. Colour: Grey. Per can.

- One component primer/filler; No mixing with other products necessary
- To be dried with UV lamp (UVL 00)
- 1-2 minutes drying (depending on the layer thickness)

TSP 1500

ETCH PRIMER GREY - 400 ML

Specially formulated for bare metal surfaces. This primer not only ensures excellent anticorrosion protection but also offers the convenience of being overpaintable without the need for sanding, allowing for a seamless application of any 1K or 2K primer/filler. Trust our Etch Primer to provide a strong foundation for your metal projects, ensuring both durability and ease of use. Per can.

- Etching primer for bare metal surfaces. Provides excellent anticorrosion protection
- Overpaintable without sanding with any 1K or 2K primer/filler

TSP 190

ZINC SPRAY - 400 ML

Go-to solution for temporary metal protection. Whether it's pre or post-welding, or spot welding, this spray has you covered. With an impressive 85% zinc content, it provides excellent protection for naked metal. Plus, it's paintable with all 1 and 2K paints, including both solvent and water-based options. Colour: Grey. Per can.

- Protects naked metal temporarily before or after welding
- Paintable with all 1K and 2K solvent and water-based paints
- Contains 85% zinc

TSP 410

WELD-THRU PRIMER COPPER - 400 ML

Premium acrylate resin primer designed for SPOT, MIG, and TIG welding. With high copper content for superior rust protection, it dries quickly to streamline welding. Compatible with most lacquer systems, it offers excellent adhesion and can be applied before or after welding. Per can.

- Acrylate resin based copper anti-corrosion primer offers rust protection for SPOT, MIG & TIG welding applications
- High concentration of copper in the dry film in a fast drying formulation to speed up the welding process with limited impact on the weld
- Has excellent adhesive properties

TSP 530

WELD-THRU PRIMER PHOSPHATE ZINC - 400 ML

Alkyd resin-based anti-corrosion primer for SPOT, MIG, and TIG welding. With high zinc content, it speeds up welding while minimizing weld impact. Offers strong adhesion, protects before and after welding, and works with most lacquer systems. Colour: Grey. Per can.

- Alkyd resin-based zinc-phosphate primer offers rust protection for welding applications

TSP 810

UNIVERSAL PRIMER/FILLER - 400 ML

Primer/filler for 1K and 2K paints, suitable for various surfaces and repairs, including spot and panel work. Apply fine layers for best results. Features a special nozzle for a flat vertical spray pattern. Shake thoroughly before use. Per can.

- Universal primer/filler compatible with 1K and 2K paints
- Suitable for all surfaces, ideal for spot, panel, and quick repairs
- Special nozzle for a spray gun-like vertical pattern

1K CLEAR COAT - 400 ML

This clear coat is designed for easy application with constant atomization pressure, providing a smooth and even finish. Achieve a high gloss level, excellent flow, and good surface hardness. Resistant to petrol, chemicals, and weather influences, it ensures durability and UV resistance. The non-fading formula and easy polishability make it a top choice. For seamless blending, use it with our TSP 920 Fade-Out Thinner. Per can.

- Fast drying, high-quality professional 1K clear coat in aerosol
- Easy application, constant atomization pressure
- Very good flow

TSP 180

HIGH GLOSS - 400 ML

A fast-drying, high-quality, professional topcoat that guarantees a superior finish. Achieve a brilliant high gloss with ease of application and constant atomization pressure. This topcoat offers excellent surface hardness and resistance to petrol, chemicals, and weather influences. Non-fading and UV resistant, it ensures long-lasting vibrancy. Enjoy very good polishability for that perfect shine. Available in both black and white to suit your finishing needs. Per can.

- Fast-drying, high-quality, professional topcoat
- High gloss
- Easy application, constant atomization pressure

TSP 1000 White

TSP 1010 Black

SPRAY MATT BLACK - 400 ML

Our Matt Black paint, a quick solution for plastic repair or efficiently covering overspray on plastic inner parts. Achieve a sleek and matte black finish with ease, providing a fast and effective solution for your automotive needs. Per can.

- Black matt paint for quick plastic repair or to cover up overspray on plastic inner parts in a fast and easy way.

TSP 910

WHEEL SPRAY SILVER - 400 ML

Revitalize your alloy wheels with our Silvery Grey Wheel Spray. Ensures fast and easy repairs for most alloy wheels on the market. The quick-drying paint, enriched with real metallic particles, guarantees a superior finish that is both UV-resistant and suitable for internal and external use. Per can.

- Silver colour repair tool, very bright and ultrafine
- Fast and easy repair for most of the alloy wheels on the market
- Quick-drying paint with real metallic particles

TSP 520 Light & ultrafine

ANTI-GRAVEL COATING PAINTABLE - 1 L

Our solvent-based Anti-Stone Chip coating, available in grey or black, offers flexible and strong adhesion. Formulated with synthetic resins and rubber, it dries quickly and can be applied without drips. Providing excellent protection against rust and stone chips, it also reduces interior noise levels. Ideal for use on front and rear spoilers, door sills, side panels, wheel arches, and more. Plus, it's paintable with all types of paints. Per can.

- Solvent-based stone chip protection in grey or black colour
- Flexible, good adhesion
- Anti-gravel coating based on synthetic resins and rubbers

AGB 01 Black

AGG 01 Grey

CONTROL POWDER WITH APPLICATOR - 150 G

Our control powder is a crucial tool for detecting imperfections and ensuring a flawless surface and body contours that match the original. Applied before the base coat in the repair process, this 150 g container comes with an applicator for precise application. Per piece.

- Control powder ensures perfect surface flatness before applying base coat, contains 150 g
- With green or black applicator

CPS 150 Green

CPS 160 Black

MAGNETIC AEROSOL HOLDER

Equipped with pre-mounted magnets on the back for easy and convenient storage of aerosol cans. Keep your workspace organized and efficient with this practical solution. Per piece.

- Aerosol holder with pre-mounted magnets on the back

TSD 50

ADHESION PRIMER - 400 ML

Our Adhesion Primer is a reliable adhesion promoter specially formulated for use on various plastics. With just one light coat, it ensures excellent adhesion, and its fast-drying formula allows for quick application. You can paint over it after just 15 minutes, making it a convenient and effective solution for your priming needs. Per can.

- Adhesion promotor to be used on most plastics
- Spray one light coat
- Excellent adhesion

TSP 030

CONTACT GLUE - 400 ML

An extremely versatile, fast-drying spray adhesive designed for professional and industrial applications. This high-strength, fast-contact adhesive bonds effectively to a wide range of materials, including laminate, wood, metal, plastic, and more. Per can.

- Extremely versatile, fast-drying spray adhesive that bonds to a wide range of materials
- Professional, industrial strength
- High initial strength

TSP 1100

STRUCTURE SPRAY - 400 ML

The go-to solution for repairing textures on plastic parts. With a variety of structural finishes to choose from, this product is user-friendly, ensuring a seamless application. The quick-drying formula allows for efficient repairs, and it can be easily painted over with any conventional 1K basecoat and 2K topcoat systems. Colour: Black. Per can.

- Special product to repair the texture on plastic parts
- Choice of structural finishes
- Easy to use

TSP 550

PREFILL SOLVENT - 400 ML

Allows for easy transfer of paint via a filling device into the can, creating a ready-to-use end product. The adaptable spray nozzle offers options for both horizontal (spray gun effect) and round (for closed parts) alignments of the spray pattern. Experience a higher spray rate and increased working speed, making it ideal for efficient spot repairs. Per can.

- Pre-filled with propellant compatible with most brands of solvent-based paints
- The paint is transferred via a filling device into the can to produce a ready-to-use end product (dealers liability)
- Adaptable spray nozzle for horizontal (spray gun effect) to round (for closed parts) alignment of the spray pattern

TSP 100 Prefill Solvent 400 ml

TSP 159 Starterset

SANDING GUIDE - 400 ML

This unique product boasts an extraordinary composition, allowing it to be sanded after just 3 seconds at 20°C without clogging the sanding paper. Unlike many comparable products on the market, our Sanding Guide eliminates the need for extra abrasive consumption. Choose the innovation that sets you apart – available in both sleek black and vibrant green. Per can.

- Sandable within 3 seconds at 20°C
- Does not increase abrasive consumption
- Available in black and fluo green

TSP 310 Black

TSP 320 Fluo green

2K CLEAR COAT - 250 ML

Tailored for professional users seeking a SMART repair solution. Achieve a flawless finish with ease by applying two layers with a quick 10-minute interval. This clear coat provides superior resistance against petrol and UV exposure, ensuring long-lasting durability without succumbing to weather influences. Per can.

- 2K clear coat for the professional user: a SMART repair solution
- No yellowing
- Petrol- and UV-resistant

TSP 710

FADE OUT THINNER - 400 ML

A versatile blending solvent designed to dissolve edges of clear coats, creating a seamless transition between old and new clear coat layers. This product is universally compatible with all A-brand clear coats, offering a fast and efficient solution for SMART repair without the need for a spray gun. Per can.

- Blending solvent to dissolve edges of clear coats
- Universal use as it is compatible with all A-brand clear coats
- No spray gun needed; so much faster in SMART repair

TSP 920

CONTROL SPRAY - 400 ML

Finixa Control Spray creates a temporary gloss layer for color inspection and detecting surface imperfections. Evaporates completely without residue. Per can.

- Acts as a clear coat for color comparison
- Highlights imperfections with magnified clarity
- Evaporates completely, leaving no trace behind

TSP 930

SPRAY ANTI-GRAVEL - 400 ML

Available in light grey and black, with a thick spray jet for applying viscous products in crosswise layers. Adjust distance for a glossier finish. Compatible with all 1K and 2K paints for durable protective coatings. Per can.

- Anti-gravel is available in light grey and black, supplied with a round thick spray jet to apply the viscous product in thicker layers
- To get a composition of layers: apply layers crosswise at a distance of 35 cm
- Shortening the distance provides a more glossy result

DUST CONTROL - 10 L

A static clear solution for spray booths floors and preparation areas. Specially designed to keep dust and dirt down on the floor to prevent dust from swirling during the paint job. Reducing the time spent on polishing job. Applied with pressure sprayer. 10 L can.

- Keeps your floor clean
- Static formula adheres dust and dirt
- Ready to apply

8210

PRESSURE SPRAYER

Convenient and durable 6.2L pressure sprayer for efficient application of Colad Dust Control (art. no. 8210). Features an automatic safety valve, corrosion-resistant FPM gaskets, and an adjustable shoulder strap for easy transport. Per piece.

- Achieves operating pressure with minimal pumping
- Adjustable shoulder strap for hands-free use
- FPM gaskets and safety valve prevent overpressure and ensure reliability

8300

SPRAY BOOTH CLEAN - 5 L

Biodegradable, VOC-compliant paint stripper. Apply with a brush or roller, let sit for 15-20 minutes, and remove with a rag or pressure washer. Safe and eco-friendly, it uses microorganisms to break down paint. Always test first and wear protective gear. Per can.

- Biodegradable and VOC-compliant for safe use
- Removes paint easily with a rag or pressure washer
- Requires minimal equipment; effective in 15-20 minutes

CBC 05

DUST CONTROL

The most original and efficient formula for suppressing dust circulation inside spray booths, workshops, and warehouses. Dust Control ionizes dust, causing it to clump together, making it too heavy to circulate in the air. Apply economically with a pressure sprayer. Per can.

- Effectively suppresses dust circulation in spraybooths, workshops, and warehouses
- Biodegradable
- Number of layers (min-max): 1/1

DUC 05 5 L

DUC 25 25 L

DUC 10 10 L

DUST CONTROL PRESSURE SPRAYER 5 L

Specifically designed for dust control applications, this manual 5L pressure sprayer is equipped with an adjustable spray nozzle, trigger lock, pressure release valve, and a convenient shoulder strap. Per piece.

- Designed for dust control application
- 5 L manual pressure sprayer
- Adjustable spray nozzle, trigger lock

DUC 50

FILM4BOOTH

A transparent, protective, self adhesive film that can be applied to mask your booth walls. Protects your walls from overspray and is easily removed by simply peeling off the layers one by one when contaminated.

Film4Booth

Art.no 6860

Long-lasting protection

User-friendly application

High heat resistance

ATEX compatibility

Professional maintenance solution

*A perfectly **spotless paintjob** needs a well maintained spray booth.*

Colad

FILM4BOOTH

A transparent, protective, self adhesive film that can be applied to mask your booth walls. Protects your walls from overspray and is easily removed by simply peeling off the layers one by one when contaminated. Roll: 90 cm x 84 m including 6 rolls of tape.

- Film is treated for paint-adhesion
- Apply to new or freshly repainted booth
- Easy to remove by peeling off each layer

6860 Roll + 6 rolls of tape

6880 3 rolls of tape

Colad

FOIL DISPENSER

Dispenser for Film4Booth rolls with wheels and a detachable handlebar for quick, effortless film application in spray booths. Per piece.

- Makes handling heavy Film4Booth rolls fast and easy
- Solid wheels and handlebar for easy movement on any surface
- Detachable handlebar for compact storage

6900

Colad

FOIL APPLICATOR

Foil Applicator to apply Colad Film4Booth in the spray cabine. Per piece.

- Simplifies the process of applying Film4Booth
- Ensures smooth and precise foil placement
- Built for reliable, long-term use in spray booth environments.

6950

Colad

LIGHT AND WINDOW WRAP

Transparent 4-layer film to protect booth lights and windows from overspray and dirt. Easy to apply and peel off. Per roll of 46 cm x 42 m.

- Keeps your lights and windows clean
- Easy to remove by peeling off the layers one by one
- Easy to apply

6861

FINIXA

PROTECTION FILM SPRAY BOOTH LIGHTING

High-tack transparent masking film with a water-based acrylic adhesive and UV inhibitor. Ideal for protecting spray booth lighting with minimal light loss, it's suitable for interior and exterior use and leaves no glue residue upon removal. Per roll.

- Protects fixtures with minimal light loss
- Removes cleanly without leaving glue residue
- Suitable for interior, exterior, and even broken windshields

CPF 10 40 cm x 50 m

CPF 11 60 cm x 100 m

FINIXA

SELF-ADHESIVE PROTECTION FILM - WHITE

White polypropylene adhesive film for surface protection against chemicals, overspray, and spills. Skid-proof, even when wet, with clean residue-free removal for up to 10 days. Enhances light reflection and resists oils and greases. Per roll.

- Shields surfaces from chemicals, spills, and overspray
- Ensures grip even on wet surfaces
- Cleanly removable within 10 days

POWERPEEL

Protect your spray booth walls effortlessly with our easy-to-apply peelable coating, designed to guard against overspray. Available in white and transparent, it's applied in just one coat using a spray gun with a 3 mm nozzle.

This water-based formula is easy to remove with water while still liquid. Once dried, it forms a durable layer that can't be washed off, allowing you to apply a CBP coating for up to 12 weeks of protection. When the CBP dries, both layers can be peeled off together for quick and convenient cleaning. Comes in 5 L containers, perfectly compatible with the SPG 80 system.

BLIZZARD WHITE PEELABLE BOOTH COATING

White protective coating for spray booth walls that protects against overspray, enhances brightness, and is easily removable by peeling. Per can of 10 L.

- Forms a strong, peelable layer to keep walls clean
- White coating for optimal light reflection
- Ready to apply with various tools; peel off when needed

8145

ICE TRANSPARENT PEELABLE BOOTH COATING

Transparent protective coating for lights and windows, safeguarding against overspray while maintaining clarity. Easily removable by peeling. Per can of 5 L.

- Keeps your lights and windows clean
- Easy to remove by peeling off the layer
- Ready to apply with a spray gun, roller, or brush

8146

POWERPEEL

Peelable water-based coating for spray booth wall protection against overspray. Available in white and transparent, it applies in one coat with a 3 mm nozzle. Once dried, it forms a durable layer compatible with CBP coatings, allowing both layers to peel off effortlessly. Per can of 5 L.

- Peel off both PowerPeel and CBP layers together
- One coat with a 3 mm spray gun nozzle
- Available in white and transparent, compatible with CBP coatings

PWP 05T Transparent

PWP 05W White

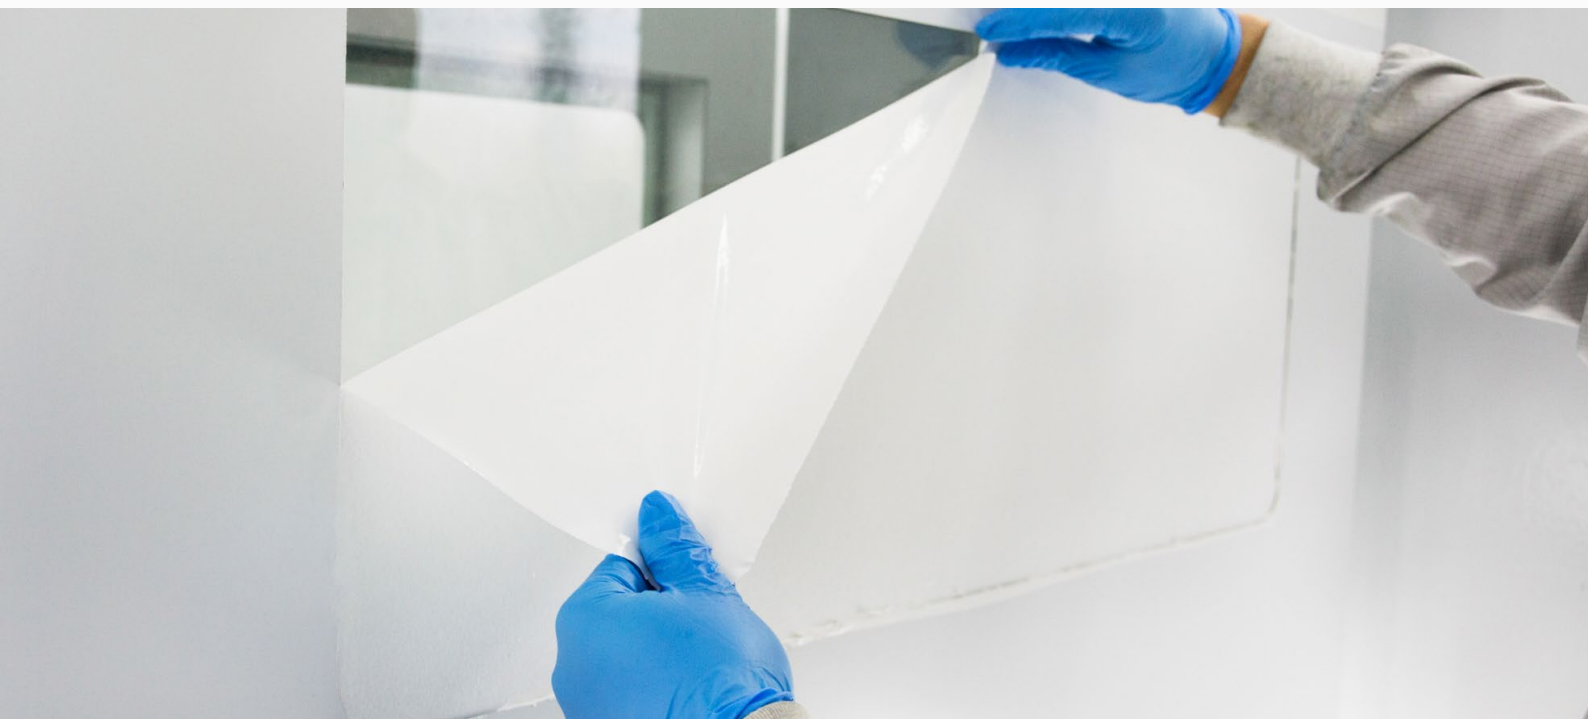

SPRAY BOOTH PROTECT - PEELABLE

White, peelable coating for spray booth wall protection against overspray. Apply 2-3 coats with a spray gun for optimal results, adding layers as needed for easier removal in one piece. Eco-friendly, water-based, and biodegradable. Per bucket of 17 L.

- Apply minimum 7-8 layers before peeling off to assure sufficient layer thickness
- Biodegradable and water-based
- Compatible with spray guns or paint rollers

CPP 17

ANTIDUST PREMIUM

A transparent, protective coating with tacky properties that forms a tacky layer on your spray booth walls. Protects your walls from overspray and captures swirling dust particles thanks to the tacky formula.

Antidust Premium protects better thanks to the improved formula during low humidity conditions, for instance during winter periods. Guarantees that your spray booth walls stay tacky up to 1 month or 85 booth cycles.

Antidust Premium
Art.no 8139

Tacky properties

Ready to apply

Silicone-free

No loss of light due to the transparency

Even performs when humidity is low

Clean booth guaranteed

Keep your **spray booth walls** **clean** with Antidust Premium

Colad

ANTIDUST

White, tacky coating for spray booth walls that captures dust, overspray, and dirt while creating a clean, new look for up to 1 month or 85 booth cycles. Per can.

- Tacky formula captures dust and overspray
- Leaves walls looking fresh and new
- Stays tacky even in low humidity conditions

8142 5 L

8140 20 L

8141 10 L

FINIXA

SPRAY BOOTH PROTECT PRO

Protect your spray booth walls with this transparent, tacky, and washable coating. It traps dust, applies easily in a single layer, and removes with water. Biodegradable and long-lasting, it shields for 10-12 weeks per 12 liters, varying by temperature and humidity. Reapply as needed. Per can.

- Transparent, tacky, washable coating to protect spray booth walls from overspray and trap swirling dust
- Apply one thick layer by means of a pressure tank, airmix in 1 thick layer
- Remove afterwards with water and sponge

PAINT WASTE CONTAINER MANUAL

Special waterproof waste container with 2 compartments for paint disposal and solvent products. You can place leftover paint and solvents upside down inside this container and close it. Liquids will leak into two different cans underneath. Any hazardous vapors will be extracted from the container through an exhaust duct. Dimensions: 122 x 100 x 60 cm.

- Made from Stainless Steel 304
- Hazardous vapors will be extracted

000458

hamach

PAINT WASTE CONTAINER PNEUMATIC

Waterproof waste containers for paint and solvent disposal. Designed to separate liquids into two cans while extracting hazardous vapors through an exhaust duct. Available in three options for different tin sizes and lid types. Complies with environmental standards. Dimensions: 122 x 100 x 60 cm.

- Made from Stainless Steel 304
- Hazardous vapors will be extracted
- 2 compartments

000459

hamach

PAINT WASTE CONTAINER EASY ACCESS

Waterproof waste containers for paint and solvent disposal. Designed to drain liquids into separate cans and extract hazardous vapors via an exhaust duct. Available in three options for tin sizes and lid types. Complies with environmental standards. Dimensions: 124 x 90 x 60 cm.

- Easy access due to the kinked lid
- Made from Stainless Steel 304
- Hazardous vapors will be extracted

000471

hamach

PAINT WASTE CONTAINER SMALL

Compact paint waste container with a single draining bin, ideal for small workspaces. Designed for waterborne paint disposal, it extracts hazardous vapors via an exhaust duct. A practical solution for reducing paint waste. Dimensions: 60 x 45 x 124 cm.

- The Paint Waste Container is small and will therefore fit into most workspaces
- It is made from Stainless Steel 304
- Hazardous vapours will be extracted

Automatic Spray Gun Washer HR 3000

Art.no 000453

**Modern design****Effective cleaning****User convenience****Safety features****Energy efficiency**

AUTOMATIC SPRAY GUN WASHER

The highly aesthetic design of the HR 3000 is an asset to any modern mixing booth. Equipped with fluid pumps, cleaning brushes and cleaning nozzle for final rinsing of the spray gun with cleaning solvent. During the automatic cleaning process you can clean a spray gun manual on the working platform. The cleaning process stops automatically when you open the lid. Only driven by max. 4 bar compressed air.

hamach

HR 3000 AUTOMATIC SPRAY GUN WASHER

Automatic spray gun washer with capacity for two spray guns. Equipped with fluid pumps, cleaning brushes and cleaning nozzle for final rinsing of spray gun with cleaning solvent. During the automatic cleaning process you can clean a spray gun manual on the working platform. The cleaning process stops automatically when you open the lid. Made from Stainless Steel 304. Only driven by max. 4 bar compressed air.

- Simultaneously cleans two spray guns with automatic and manual
- Automatic shut-off when the lid is opened
- Powered by compressed air (max. 4 bar), no electricity required

000453

hamach

SPRAY GUN WASHER HR 2000

A manual spray gun washer for solvent paint. With vapour extraction connection. All you need is a 5 bar air pressure connection. Simple and effective.

- With vapour extraction
- Made from Stainless Steel 304
- Simple and user friendly

000473

hamach

MICRO CLEANER HR 1000

Wall-mounted Stainless Steel 304 washing tank for manual cleaning of putty spreaders and small parts. Features a cleaning brush, automatic fluid circulation, and connection to compressed air. Equipped with a drain cock and front flap that doubles as a cleaning table. Tank capacity: 7L. Dimensions: 46 x 19 x 53 cm.

- Uses max. 7 L solvent
- Great work floor
- Stainless Steel 304 construction; compact

000457

hamach

SPRAY GUN WASHER HR 2400

Pneumatic manual spray gun washing machine. To be connected directly to water supply. With space to carry out the coagulation process and a pneumatic system to accelerate this process. A large tank with a filter system and 4 large wheels to collect all waste, is easy moveable. A security valve limits the excess of water.

- Easy to move thanks to the 4 large wheels
- Made from Stainless Steel 304
- Large tank

000474

hamach

HR 1400 SPRAY GUN CLEANER

Cleaning your spray gun in between jobs is a time consuming task. The quick and compact Hamach Spray Gun Cleaner increases your productivity by enabling you to clean your spray gun from leftover waterborne paint in a matter of seconds! Made from Stainless Steel 304. Dimensions: 85 x 30 x 20 cm (H x W x D).

- Environment friendly: limited use of water and limited waste
- No messy cleaning with inadequate squeezing bottles
- Integrated jerry cans (no cans on the floor)

000452

hamach

CLEANING FLUID HR 1000

This is a cleaner, very active and only made with biodegradable products. Suitable for cleaning polyester mastic, two-component polyurethanes, water-based and solventbased paints, clear coat as well as various kinds of adhesives from spreaders, rules, etc. Environmentally friendly, does not produce vapours. 10 L can.

- Suitable for spraying, dipping and brushing in the automotive pre-processing.
- Origin of biodegradable ingredients
- Creates no additional ATEX zone

009819

QUICK CLEANER

Effortlessly clean water-based basecoats without leaving your spray booth. Save valuable time with 30-second cleaning intervals. Use it in combination with BTC 80 (water-based gun shampoo) for efficient cleaning, with just 5 liters serving 100 guns. Quick Cleaner is compatible with all disposable cups and Atex certified for safety. Streamline your process with Quick Cleaner.

- To clean all waterborne paints
- No need to leave the spray booth
- Saves time

AGC 50

AUTOMATIC GUN CLEANER WITH FULLY AUTOMATIC RINSING

Same powerful performance as our AGC 21, but with the added convenience of the fully automatic cleaning system AGC 35. Simple, efficient cleaning for your spray guns.

- Same as automatic gun cleaner AGC 21
- Fully automatic rinsing system AGC 35

AGC 31

H²O GUN SHAMPOO - 20 L

Save time and automatically clean your water-based paint guns effortlessly. With only 100ml of rinse required per gun, it's extremely cost-effective. Reduce waste significantly (up to 90%) and dispose of it responsibly through an authorized collector. This shampoo can be coagulated up to 10 times and is compatible with all automatic and manual gun cleaners. Plus, it's water-based for an eco-friendly solution. Per can.

- Save time and clean your spray guns for water-based paint automatically
- You only need 100ml of shampoo for one spray gun
- Cost reducing and higher customer satisfaction

BTC 80

AUTOMATIC GUN CLEANER WITH TWO PIECES DOOR

Efficiently clean paint guns, whether solvent-based or water-based. Easy installation and operation, with a convenient brush and optional manual post-cleaning. Compact, stainless steel, and equipped with automatic extraction.

- To be used in combination with cellulose thinner to clean solvent-paint guns or BTC 80, to clean water-based paint guns
- Equipped with a brush for pre-cleaning
- Possible after-cleaning with clean material / air mixture

AGC 21

AUTOMATIC GUN CLEANER WITH FULLY AUTOMATIC RINSING

Experience the convenience of our AGC 21 automatic spray gun cleaner, enhanced with the external air blowgun AGC25, galvanized cover plate AGC26, and the fully automatic cleaning system AGC35. Simplify your spray gun cleaning process with this comprehensive solution.

- Same as automatic gun cleaner AGC 21
- External air blow gun AGC25
- Galvanized bin cover AGC26

AGC 40

REGENERATOR FOR BTC 80 - 1 L

Revive the cleaning power of your coagulated BTC 80 with just 1 liter of our Regenerator. It restores BTC 80 to its original cleaning strength, and one liter is enough for 20 liters of coagulated BTC 80. Keep your cleaning solution working like new. Per bottle.

- Adding 1 L of regenerator to the coagulated BTC 80, brings back the original cleaning power of the BTC 80
- 1 L of regenerator is sufficient for 20l of coagulated BTC 80

BTC 001

COAGULATION SET - 25 L

Solution for reusing cleaning fluids. Pour up to 25 liters of contaminated liquid into the upper container, add coagulation powder, and let it circulate for 10 minutes using the built-in aerator. Purify and tap the fluid for reuse. With Finixa, you make eco-friendly and efficient use of your cleaning agents! Per set.

- Can be used to coagulate any type of water based paint
- Up to 25 L
- Pneumatic mixing system included

AGC 10

COAGULATION POWDER

Powerful solution for treating contaminated fluids like BTC 80. Use 500 g per 20 L, and watch as AEC, a concentrated, foam-free powder, purifies oil-containing wastewater, emulsions, and water-based paints with ease. Simply stir AEC into the mixture, wait 10-15 minutes, and separate using a filter press or belt filter. Per bucket.

- Powerful universal coagulation powder
- Depending on the intensity of the pollution, use about 500 gr coagulation powder for 20 L contaminated BTC 80

AEC 90 5 kg

AEC 91 500 gr

STICK & GO®

Stick & Go® self-adhesive white film protects surfaces like stainless steel tabletops. Durable, chemical-resistant, and easy to apply, it ensures optimal reflection with a ribbed anti-slip surface.

- Strong, 100-micron film resists chemicals and solvents.
- Ribbed texture ensures safety during use.
- Simple to cut, apply, and remove.

BUMPER STAND

This mobile stand is designed for convenient bumper storage. It features 8 adjustable supports, all cushioned for safety. When packed, its dimensions are 123 cm x 31 cm x 20 cm, and it weighs 25 kg. Per piece.

- Mobile stand for storage of bumpers
- Equipped with 8 adjustable supports all cushioned for safety
- Dimensions (LxWxH) packed: 123 cm x 31 cm x 20 cm

EQU 50

BUTTERFLY TRESTLE PREMIUM

This folding trestle offers premium quality and can be adjusted in both height and width using two chains. The feet are securely attached with an extra bar for added stability. When packed, its dimensions are 107 cm x 32 cm x 9 cm, and it weighs 8.5 kg. Per piece.

- Folding trestle that can be adjusted in height and width by means of two chains
- Premium quality, feet are attached by means of an extra bar
- Dimensions (L x W x H) packed: 107 cm x 32 cm x 9 cm

EQU 53

X-TRESTLE STANDARD - GALVANIZED

This adjustable trestle features a locking system on the axis for various positions. The standard X-trestle is galvanized and equipped with a metal axis locking system. It measures 19 cm x 9 cm x 123.5 cm and weighs 8 kg. Bumper supports (EQU 61) are available separately. Per piece.

- Adjustable trestle with locking system on the axis for different positions
- Standard X-trestle is galvanized and has a metal axis locking system
- Dimensions: 19 cm x 9 cm x 123.5 cm

EQU 60

WHEEL AND PANEL STAND

Mobile Wheel and Panel Stand with foam-cushioned horizontal supports for safe handling. Removable wheel supports allow accommodation of larger panels like hoods and bonnets. Compact and easy to store. Per piece.

- Mobile panel stand with two horizontal supports with two wheel supports on each side
- The wheel supports can be taken off so the stand can be used for larger panels such as hood or bonnet
- Dimensions (LxWxH) packed: 91 cm x 70 cm x 15 cm

EQU 52

BUTTERFLY TRESTLE

The Butterfly Trestle (114 cm) is a foldable and lightweight support stand designed for efficient use in automotive refinishing and repair. Its sturdy frame and compact design make it ideal for holding panels or parts during sanding, painting, or preparation work. Per piece.

- Easy to store and transport
- Durable frame ensures stability during use
- Perfect for holding panels or parts in various tasks

EQU 59

BUMPER SUPPORTS FOR EQU 60 - GALVANIZED

These bumper supports are designed for use with EQU 60. They are galvanized and easy to adjust using two plastic wing nuts. Per piece.

- Bumper support for EQU 60
- Galvanized
- Easy to adjust with 2 plastic wing nuts

EQU 61

PORTAL ROTATING PANEL STAND

The Portal Rotating Panel Stand features a lockable rotating central axis for versatile positioning, controlled by a foot pedal. Equipped with axis extensions, vertical supports with hooks, and supports with holes, it is ideal for holding panels or doors during preparation. Per piece.

- Central axis locks at various angles for optimal positioning
- Includes extensions for fitting two doors side by side
- Packed dimensions of 149 x 23 x 16 cm; supports up to 50 kg

EQU 64

SPARE PART CART

This handy chariot keeps your parts organized for each job. With dimensions of 210 x 65 x 90 cm and a maximum load capacity of 230 kg, it's an essential tool for efficient organization. Per piece.

- Keep your parts organized for each job in the handy chariot.
- Dimensions: 210 x 65 x 90 cm
- Loading capacity: 230 kg max.

EQU 80

PANEL FIXATION SET

This set includes 4 interchangeable bars designed to securely hold panels in an open position while you work on them. Ideal for doors, bonnets, and boot lids. Stay hands-free and work efficiently. Per set.

- Set of 4 interchangeable bars that can be used to fixate panels in a firm 'open' position to work on them
- Each bar has a hook and an eye for attachment on to a lock

EQU 91

hamach

BALE PRESS

Pneumatic paper and plastic press. Reduces waste volume substantially. Provided with a water separator and safety system that prevents you from opening the pressing room while operating. Ready to use, incl. 2 rolls of cord. Pressure: 8 - 10 bar (115 - 145 PSI). In accordance with: EN 13736 : 2003 + A1 : 2009. Dimensions: 70 x 75 x 152 cm. Per piece.

- Pocket light with 2 modes: high brightness 2W COB LED and 1W torch
- Slim design for handy inspection
- 360° rotating magnetic clip

DPL 20

TRIM REMOVAL TOOL SET

Complete trim removal tool set with durable plastic tools for safely removing interior panels without causing damage. Comes in a compact, organized case for easy storage and accessibility. Per set.

- Prevents damage during interior panel removal
- Includes all essential tools for various trim removal tasks
- Neatly stored in a handy toolkit case

TRT 27

COLOUR INSPECTION LAMP - 360°

Rechargeable inspection lamp with a CRI of 97 for precise color matching and detecting paint imperfections. Features a 360° rotating body, collapsible hanging hook, magnetic folding base, 3W front torch, and removable lens. Durable with a rubber-coated body and USB charging. Per piece.

- Handheld, rechargeable inspection lamp for accurate colour matching and detecting paint imperfections
- Highest colour matching of any LED light on the market (CRI 97)
- Body rotates 360°

CIL 01

FLUO MARKERS

Perfect for marking smaller car damages. Easily removable with any degreaser, available in vibrant green and pink. The MAR 1XX (round) draws a 1.5 mm line, while the MAR 2XX (rectangular) creates a 1.5 mm point, 5 mm on one side, and 15 mm on the other. Note: Avoid use on fresh paint to prevent scratches, and be cautious with solvents, as they may react with the MAR liquid. 12 pieces for the small markers, 6 pieces for the large makers.

- Handy to mark smaller damages on cars
- Easily removed by any type of degreaser

MAR 11 Green, small

MAR 21 Green, large

MAR 12 Pink, small

MAR 22 Pink, large

STEP-UP BLUE

Versatile solution for reaching higher spots on larger vehicles and providing a comfortable seat for various activities. This strong and lightweight polypropylene product can support up to 175 kg. With no sharp corners to risk car damage, it features an opening in the sides for easy carrying, rubber anti-slip feet, and anti-slip steps. Per piece.

- Strong, safe and lightweight
- Handles up to 175 kg
- Weighs only 3.4 kg

SUP 00

PNEUMATIC MACHINE - 4.000 RPM

The Pneumatic Machine 4000 RPM is designed for efficient adhesive, sticker, and tape removal when paired with Finixa's Adhesive Erasers. With a rotation speed of up to 4000 RPM, it ensures fast and safe results without damaging surfaces. Per piece.

- Operates at up to 4000 RPM for quick removal tasks
- Works with adhesive erasers to protect underlying surfaces
- Perfect for use with Finixa PRD 05 and other adhesive erasers

PRD 55

RIDGED ADHESIVE ERASER Ø 100 MM X 26 MM

The Ridged Adhesive Eraser (100 mm x 26 mm) efficiently removes adhesives, stickers, and double-sided tape without damaging surfaces. Ridged shape improves heat evacuation reducing the risk of burning the lacker. Made of natural rubber, it fits directly onto the PRD 55 machine for faster and safer results. Per piece.

- Removes adhesives without harming underlying paint or material
- Ridged disc for faster removal when used with the PRD 55
- Natural rubber construction for professional-grade performance

PRD 05

ADHESIVE ERASER WITH INTEGRATED ARBOR Ø 88 MM X 15 MM

Efficiently remove adhesives, stickers, and double-sided tape without surface damage using Finixa's Adhesive Eraser Kit. Made of natural rubber, the rotation discs are designed for use with power drills at 2,000–4,000 rpm, offering safe and precise results. Per piece.

- Removes adhesives without harming the underlying surface
- Compatible with most power drills and available in multiple models
- Ridged PRD 05 disc fits directly on PRD 55 for faster, safer removal

PRD 01 Eraser

PRD 50 Arbor

STEEL BRUSH

High-performance steel brush for removing paint and corrosion quickly and efficiently with minimal metal degradation. Designed for use with the Finixa PRD 55. Per piece.

- Effectively removes paint and corrosion with precision
- Minimal degradation of the underlying surface
- Specifically made for the Finixa PRD 55

PRD 10 Steel brush

PRD 11 Adaptor

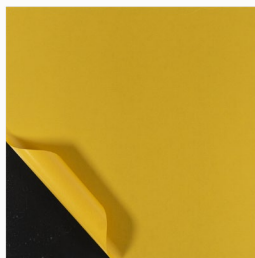

SOUND DEADENING PADS 50 X 50 CM

Designed for easy application in doors, boots, roofs, and more, these bitumen-based pads prevent sound vibrations for a quieter drive. Flexible, heat-resistant, and easy to cut, each pad features a perforated line for splitting into two 25 cm x 50 cm sections. Per 10 pieces.

- For application inside doors, boot, roof etc. to prevent sound vibration
- Bitumen based with protection layer, very flexible, easy to cut and heat resistant
- Each pad can be torn in half due to a perforated line in the middle to make two pads of 25 cm x 50 cm

WAP 10

TRUNK ISOLATION PADS 50 CM X 50 CM X 1.75 MM

Self-adhesive bitumen-based sound deadening pads, designed for flat surfaces like doors, boots, and roofs, as used by OEMs in German cars. Flexible, heat-resistant, and easy to cut, they effectively reduce sound vibrations. Per 10 pieces.

- Specific flat surface, as OEM-applied in German cars
- For application inside doors, boot, roof etc. to prevent sound vibration
- Bitumen-based with protection layer, very flexible, easy to cut and heat resistant

WAP 15

WALL MOUNT FOR DISPENSER BOX

Optimize your workspace with the Wall Mount for Dispenser Box. Keep gloves, tissues, or wipes within easy reach near your work area. The adjustable spring-loaded clamp accommodates various box sizes. Installation is simple with adhesive strips for smooth surfaces, and screw holes are provided for a secure setup. Per piece.

- Universal holder keeps disposable gloves, wipes or your GPS System within reach, easy installation

CENTRAL DUST EXTRACTION

HCV Central Vacuum for dust extraction is top of the range concerning: Service, Quality, Safety, Efficiency and Innovation. Our qualified Hamach engineers develop dust extraction systems that collect sanding dust at the source (the sanding machine). All of our systems are 100% tailored to your work processes and applicable ATEX regulations. In addition to the health benefits of reduced sanding dust, HCV dust extraction systems keep dust particles from contaminating your fresh coating layers.

ENERGY BOX EB BASIC 230 V

Add an Energy Box to your HCV installation and you have maximum working flexibility in daily operations. All functions combined in one unique central Hamach HCV device! Control the HCV machine, operate sanding machines/spray guns/air flow pistol/insert other machines in the electric connection and/or hang machines and hoses. The Hamach Energy Box is one central spot for compressed air, vacuum and electricity!

- dust extraction connection for 2 sanding machines, in one double switch
- electric power connection
- compressed air connection with safety coupling

ENERGY BOX EB BASIC 400 V

Add an Energy Box to your HCV installation and you have maximum working flexibility in daily operations. All functions combined in one unique central Hamach HCV device! Control the HCV machine, operate sanding machines/spray guns/air flow pistol/insert other machines in the electric connection and/or hang machines and hoses. The Hamach Energy Box is one central spot for compressed air, vacuum and electricity!

- dust extraction connection for 2 sanding machines, in one double switch
- Equipped with a hose bracket, machine bracket, and on/off switch for the HCV motor.
- compressed air connection with safety coupling

FILTER HCV 410 HQ

High-performance filter for HCV 410 HQ units, offering exceptional dust filtration capacity for professional use.

- >99.1% efficiency (L-class)
- Tailored for HCV 410 HQ

056134

hamach

FILTER HCV 410 A

Efficient M-class filter for HCV 410 A systems, ensuring superior dust extraction for industrial applications.

- >99.9% dust filtration capacity
- Tailored for HCV 410 A

FILTER HCV 510 HQ

Comprehensive filter set for HCV 510 HQ units, delivering >99.1% L-class filtration efficiency for demanding environments.

- Advanced filtration with >99.1% dust capture
- Complete Filterset. Filter capacity: >99.1% L-class
- Tailored for HCV 510 HQ systems
